Pia's group: Material situations and spatial arrangements, (art)piece is between people

About:

To support your own practice that can be materialized with any medium, physical or digital. The focus will be on the context of display, when the work is not anymore an illusion of an author but something that is between us and when the author becomes one of the viewers.

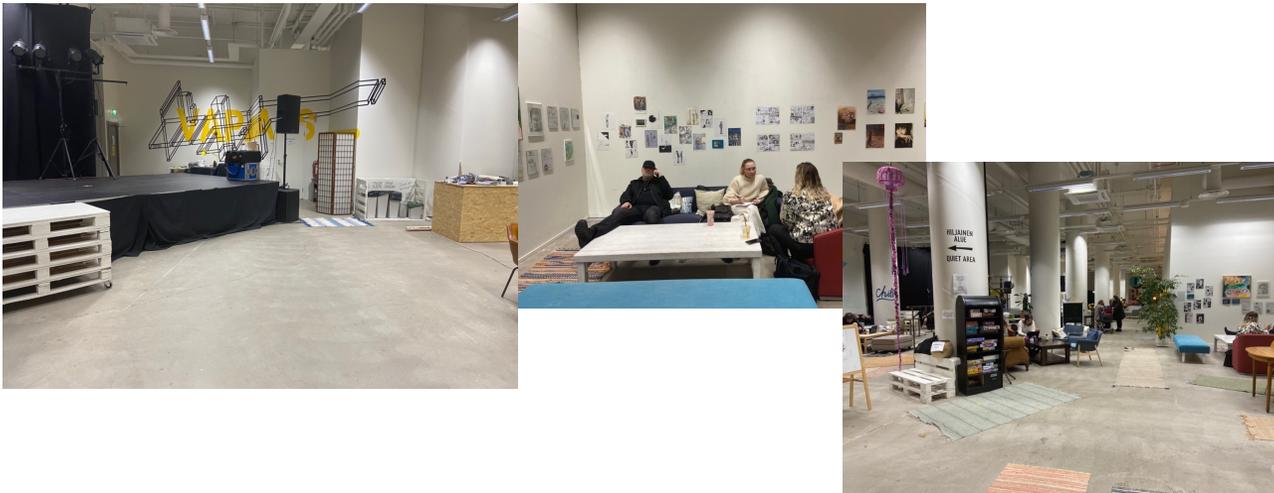

Pia's group: Material situations and spatial arrangements, (art)piece is between people

How:

We have space booking in Metallimiehenkuja 2 for us to work together and learn from each other. We will decide together the working methods before the intensive working period on period five!

Besides that we have an exhibition opportunity in Kalasataman Vapaakaupunki, in REDI on 1. – 25.6. and we are welcome to use the space for experiments during the course. The space is very good for exploring the interconnections and reflections of your work and surrounded world. This is an option and not mandatory.

This is open for both groups.
