

Assignment: Team Presentation

At the end of the course, you will introduce your solution/s to the rest of the class. Similar to the writing process, we will also follow a process approach to the final presentations.

Your final presentation should be 15-20 minutes long and each member of your team needs to speak for at least 3 minutes. Your presentation needs to include an introduction, a body and a conclusion. Since you are presenting as a team, pay special attention to smooth transitions between speakers.

Make sure that in the presentation you introduce

1. the current situation
2. the problem you've identified in the scenario
3. your solution/s to the problem including all aspects of expertise (design, technology, business) in your group
4. recommendation based on the evaluation of your solution

After the presentation, there will be 10-15 minutes for questions and discussion (being an opponent).

Grading: Your final presentation grade consists of both team elements and individual elements. Please see the grading rubric in MyCourses for further details.
