<p>WAT-3010 SPECIAL COURSE ON WATER & ENVIRONMENTAL ENGINEERING (5 cr) (can be taken during any period)</p>				

The 60 credit Major consists of two common courses (10 cr + 5 cr) as well as 45 credits of advanced courses: these can be selected from the 16 courses available above.

The advanced courses include four thematic study paths: the students can either follow those paths or create their own course mix based on their interests. The personal portfolio created during the Introductory course facilitates this decision.

The thickness of the course is indicative for credits / period.
