

Steps for connecting to Wihuri outside Aalto network and without VPN. Note that if you have Aalto VPN installed on your computer, direct login via Putty works too.

1. Run Xming / Xlaunch as usual
2. Use Putty (or another ssh client) to log into `kosh.org.aalto.fi` which is the central unix server available for students
3. From Kosh, login to to Wihuri via giving the command
`ssh wihuri.pub.chemistrylab.aalto.fi -l [username]`

Software available for Aalto University students can be downloaded and installed from here

<https://download.aalto.fi/>
