Emergent User Interfaces

CS-E4200

Matchmaking

Where we are

- Today
 - Forming project groups
- Week 6 (next)
 - Lab on physical computing
- Week 7 Project Pitching
 - Each team, give ~ 5 min presentation on your idea and get/give feedback
- Then you start building!

Goal of Today

- Get a team, get an idea!
- Once you have both you can go (if you want to)
- BUT MAKE SURE
 - You can contact each other
 - You have more meetings to develop your idea
 - We teachers also have your contacts

Gallery Walk

- We have all your ideas on the tables (and some from us)
- Go take a look at them
- Stand by the ones you like and talk to the other people there.
- Feel free to leave and join discussions
 - You can merge ideas together and change them!
- Hopefully you will get into a nice team

Things to Consider

- What is the background of your teammates
 - Programmers, hardware hackers, crafts?
- Multiskilled teams are usually best
- Can you work with these people?
- What do you want to get out of the project?
 - New skills, develop an idea?

Important Points

- NO APPS!!!!
 - Unless you can really justify it!
- We STRONGLY urge you towards tangible user interfaces
- You will have to build this, and convince us its a good idea
