

# Assignment 3: Definitions

At this point, you have already written the first version of your introduction section. Next, it is time to write a section that defines the main concepts (new and old) of your report: *Section 2 Definitions* as shown in the outline below. The length of this section ranges between 150 and 250 words. See Feasibility report on *Tablet Computers: Comparison and Recommendation* for an example section on definitions.

After writing this section, submit the text to your pre-assigned peer(s) for feedback **together with the introduction section** you wrote earlier.

## Report Outline

### 1. Introduction

- a. Situation
- b. Client (who does this concern?). **Choose one** type or focus
  - General scientific or academic problem (or need)
  - Industry problem (or need)
  - Client problem (e.g. individual institution, company or group of people)
- c. Problems related to the situation and client
- d. Proposed solutions 1 and 2
- e. This paper aims to evaluate/compare two alternatives solution: 1 and 2

### 2. Definitions

- a. New solution
- b. Alternative solution (or old)

### 3. Criteria for evaluation

- a. First criterion
- b. Second
- c. Third

### 4. Evaluation of new solution against the alternative solution by criterion

- a. Evaluation/comparison based on the first criterion
- b. Second
- c. Third

### 5. Conclusion and recommendations

- a. Summary of the paper's contribution (2-3 sentences)
- b. Importance or implications of the solution in future
- c. Recommendations for science, industry or client: which would be recommendable for to address the problem?

### 6. References

3 or more references
