When you go to the homepage of the Creative Cloud you will notice Install next to already downloaded apps on your computer.

When you have existing CC applications installed, and then you switch to a different language, its normal to see «Install» button beside all applications.

Don't panic! This is a feature. When you switch the language, it is allowing you now to install yet another copy with Arabic support.

After you installed go to Indesign.

Inside Indesign activate the Paragraph window.

By clicking this you can see more options for the paragraph.

Make sure you activate the World-Ready Paragraph Composer

CheckList:

- Always make sure you choose a font that supports Arabic. Those can be found in Adobe typekit, fontstand, and Google.
- Make sure the Arabic glyphs are connected!
- Make sure the paragraph is Right-to-Left
- Justification can be centererd, right justified, fully justified, fully justified center, fully justified right
- •Have fun!
