2020 – 27.11.20 – Studio 1*

JUST Cities are ...

The right to the city is the right to presence, to occupy public space, and to participate as an equal in public affairs.

Sandercock (2009: 220)

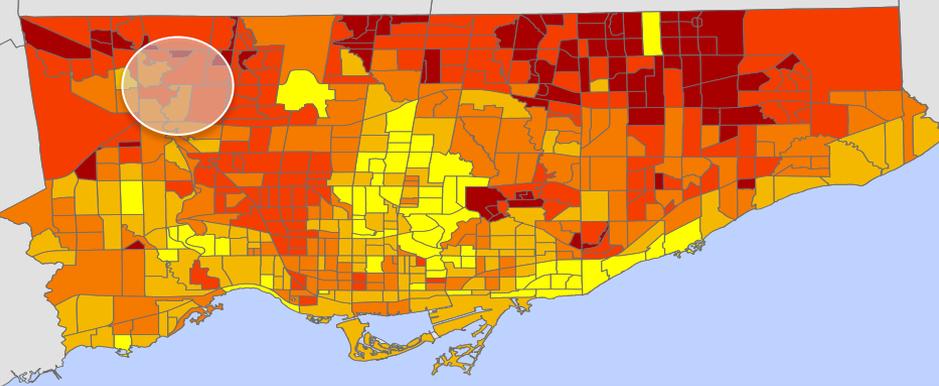

Leonie Sandercock, Professor of planning, University of British Columbia

[...] cities are becoming **ecologies of surplus** that can only yield a **politics of the fittest**, with the collision of bodies in public space reduced to a game of **appropriation of the commons**, based on pathologies of **envy, suspicion and resentment**. Public space becomes a synonym for **collective privatism** and **social antagonism** rather than **social agonism** and civic formation.

Amin, 02.06.2009

P

CYBER

SPACE

how to design and manage urban public spaces that cater to heterogeneous publics consisting of individuals whose needs and aspirations we hardly know?

Amin (2009) argues that:

public space does not concern only human 2 human interactions

People – Space – Time – Visible Thing – Nature – Other Species
– Invisible Infra – etc.

all and all a condition of “**situated multiplicity**”

we can only *hope* that public space contributes to *civiness*
there is no tool-kit only possibility-making
Amin suggests to work with the keywords:

multiplicity

symbolic solidarity

conviviality

technological maintenance

multitplicity

the active juxtaposition of diversity, the play of ground-up and distributed watchfulness, and an entanglement of uses - economic, social, and cultural - that promises individual and collective benefits

**symbolic projections [...]
oriented towards **aesthetic
disruption rather than
hegemonic confirmation,**
but always in the spirit of
reinventing the ties that
bind.**

symbolic solidarity

[...] incorporating **new** images into **visual representations** of the city can be **democratic**. It can integrate rather than segregate social and ethnic groups, and it can also help negotiate new group identities.

(Zukin, 1995: 20)

Sharon Zukin, Professor emerita of sociology, Brooklyn College and the City University of NY Graduate Center

conviviality

comprehensive audit of the sources of civic ease in public space, an exercise that might reveal how the design and lay-out of mundane intermediaries such as sewage systems, traffic rules, public toilets, street furniture, spaces for dogs, children, cars and pushchairs, affect not only the social experience of space but also the civic remains of such experience.

conviviality

technological maintenance

**along with postcodes, pipes
and cables, satellites,
commuting patterns,
computers, telephones,
software, databases,
regulate urban provisioning
by setting the delivery
systems, internet protocols,
rituals of civic and public
conduct, family routines
and cultures of workplace
and residence.**

[expose the] pervasive
entanglement between
urban technological
systems and the social life
of cities.

technological maintenance

Thank you!
