

Modeling assignments

e.n. 12.1.2017

Report instruction

Try to keep the report short but readable and self-contained.

Use the following structure:

Cover

- Course code and name
- Assignment name
- Student's name, study number and email
- Parameter combination number

1 Introduction

- Purpose of the report

2 Problem and model

- Modeling method and software
- Model description

3 Experiments

- Tests, used values and results

4 Analysis

- Explain the results: what and why?

5 Conclusions

- What general and specific conclusions can be made based on the results and analysis
- Practical value?
- Reliability of results?
