

Preliminary schedule of:

Quantum Thermodynamics course (BSc)

Spring 2021

Preliminaries	1 st lecture (11.01.)	Chapters 1 & 2
	2 nd lecture (13.01.)	Chapters 3 & 4
Classical thermodynamics	3 rd lecture (18.01.)	Chapters 11 & 12
	4 th lecture (20.01.)	& 13
Statistical mechanics	5 th lecture (25.01.)	Chapters 14 & 15
	6 th lecture (27.01.)	Chapters 16 & 18
Quantum thermodynamics	7 th lecture (1.02.)	Chapters 19 & 20
	8 th lecture (3.02.)	& important parts of 22
Quantum thermodynamics	9 th lecture (8.02.)	Chapter 29 Quantum statistics and electron transport
	10 th lecture (10.02.)	Open quantum systems I, LC circuits and qubit
	11 th lecture (15.02.)	Density matrix and master equation
	12 th lecture (17.02.)	Applications: thermometers, detectors, heat engines and refrigerators

- NOTE: Chapters refer to Stephen J. Blundell and Katherine M. Blundell, “Concepts in thermal physics”, 2nd edition (2019).
