

## **IDENTITY OF SPACE**

**12.1.- 23.2.2021**

**Aalto University / Spatial studies MA 1, Module C / Identity of Space**

### **TASK 05 final project**

**COMPASS SQUARE, HELSINKI RAILWAY STATION (KOMPASSIAUKIO)**

**Deadline Tuesday 23.2.2021, 9.15**

The fifth task is to finalize your project. Sum up all the learnings from the course and squeeze your concept and atmospheric ingredients of the space into a coherent form. Use professional media such as plan drawings, sections and visualizations in order to clarify your ideas.

In addition to the digital presentation, you can also build up a physical model and document it by photographs. If you wish you can also include manipulated reference images, material and/or colour palette, mood boards, etc. Collect all the essential information into a pdf-package to be presented in the final review. According your aims you may also include some animations, video clips, recordings, etc. to your 15 minutes presentation. In case your space consists of various spatial conditions, you also can create a series of time sequences shown as a storyboard. The technique is up to you and the scale is freely to be chosen. Consider what serves best your concept.

**Good luck!**

Tutorial times:

Thursday 18.2, 9.15->

Review:

Tuesday 23th, 9.15-> presentations by the groups in max. 15 minutes / a group
