The basic questions concerning the retail marketing strategy are:

1. What is our target market?

- The market segment(s) toward which the retailer plans to focus its resources and retail mix.

2. What is our retail offering?

- The nature of the retailer's operations (retail mix).

3. What is our competitive advantage?

- Factor(s) that puts a retailer in a superior business position

Source: McGraw-Hill/Irwin, Retailing Management

Typical elements of retail mix i.e. retail offering:

- Assortments
- Pricing
- Customer service
- Communication
- Location (if retailer operates in offline environment)

In short, the retail mix is the combination of those elements through which a retail strategy is implemented in practice.
