

Energy Forum Assignment

Attend at least 6 Energy Forum guest lectures.

Write a short reflection essay on the lectures you attended and discussing the following questions:

- How do the speakers understand today's energy related challenges?
- What is your opinion on the speakers' proposed solutions/value their company provides to customers and society?
- Why do you think the company representatives chose these topics?
- Whose presentation inspired you? Why?

Focus on reflecting and drawing your insights, as opposed to just summarizing the content of the presentations.

Response length: max 750 words, 1.5 spacing, 2 cm margins. There is no lower limit, but it's naturally more difficult to deliver the same amount of information and insights using a lower number of words.

Please include your name, student number, course code and date. Please also list the dates of the seminar lectures you attended.

Submission between 25.10 and 17.12. It is recommended to submit the essay before December, to allow you to focus on the final project.
