

NEGLECTED SPACE

Autumn 2021

Aalto University / Spatial studies MA 1, Module A / Neglected Space

Towards the concrete scheme

task 3 (Thursday 30.9 – Tuesday 12.10):

Now since the main concept and the space are outlined the task is to move into more concrete level. The outcome of this phase will serve directly as the base for your forthcoming final presentation.

This means for example working in the determined scale, where the main principles of your project can be presented. Similarly the programme and the user's points of view are to be determined more concretely. The site plan, sections, elevations and plans are presented in the scale chosen by each group (according the size of the space and context). We recommend to include a human figure to the drawings in order to describe the scale and the relationship to the space.

Ideas of the details will be shown at least in a generic way. In case your project has many features or details, we advice to choose the main features, details and spaces which create the character and the atmosphere for your project.

Execution in the task 3:

The format of the presentation is digital (PowerPoint, pdf. etc.). The material produced and presented is up to you, but besides the technical drawings, sketches, diagrams, concept models, reference images etc. are welcomed. We suggest you to have at least site plan, section, elevation and freely chosen preliminary 3-D visualization (perspective, axonometric etc.) in order to explain your idea. The outcome will be shown in 15 minutes (max.)
