Details of course evaluation

Passing the course requires passing each mandatory course components: calculation assignments, course project and the exam. In addition, you can earn extra points for pre-lectures assignments and for giving feedback on the course. The limits for passing, the maximum points and the weighing factors for each evaluated course component are as follows:

Evaluated course component	Limit to pass	Maximum points	Weight factor
Course project points (H)	12,0 p.	26,0 p.	1,2
Calculation assignment points (N)	40,0 p.	60,0 p.	0,3
Mid-term / Course exam points (T)	12,5 p ⁱⁱ .	30,0 p.	1,7
Pre-lecture assignment points (L)	-	3,0 p.	1,0
Feedback point (P)	-	1,0 p.	1,0

ⁱⁱ Note that the limits for passing mid-term exams is 7,5 p for mid-term 1, and 5,0 p for midterm 2. The maximum points for each mid-term exam is 15,0 p. You can retake a mid-term exam during the course exam.

If the student's points exceed the limit to pass in all evaluated course components with such a limit, the student receives a grade for the course. The grade is determined through multiplying each

the student receives a grade for the course. The grade is determined through multiplying each evaluated course component with its weighing factor (which is based on the workload of respective component), and then adding together the weighted points:

$$\text{Course points}^{\text{iii}} = (H \times 1,2) + (N \times 0,3) + (T \times 1,7) + L + P$$

after which the final grade is determined according to the following limits:

Grade	1	2	3	4	5
Course points, no less than	51,9	60	70	80	90
