

# AAE-E1000 information on evaluation–Autumn 2022

## **Evaluation overview**

Each assignment will be marked on a scale of 0-5, and the final grade of the course is the weighted average. You will need to get an average of at least 1.00 to pass. There is no additional passing requirement for individual pieces of assignment (e.g. a zero for outline will contribute for the final grade, but will not by itself lead to a fail for the full course)

## **Course Project (Weight 75%)**

The course project will be evaluated using the rubric found under “Materials” on the MyCourses page (note that 0.25 grade increments are used for the total, weighted final assignment score). Read carefully the assignment text and post any clarifying questions to the General Discussion board on MyCourses. Two Q&A sessions will be organized, about 4-5 and 1 week before the deadline (exact dates TBA)

The assignment outcome and feedback will be reported through MyCourses.

Deadline: 16.12.

## **Course Project Outline (Weight 5%)**

Rough outline of the proposed project, including country choice, country specific subsection titles (i.e. based on your early assessment of what is important for this country), initial bibliography and some bullets under relevant sections reflecting the lectures and readings so far.

Marked 5 for doing what is asked, 3 if minor gaps exist and 0 if no submission/no real attempt to do what is asked.

Deadline: 24.10.

## **Energy Forum Assignment (Weight 20%)**

The Energy Forum assignment consists of **six** learning diary entries, for chosen six Energy Forum seminars, each marked 5 if done what was asked, 3 if minor problems, 1 if submitted, but with severe problems or 0 if not submitted/no real attempt to do what was asked. Final grade for

the assignment is the average of the (first) six entries – rounded to the closest 0.25 grade (i.e. individual weekly exercises are marked using full numbers, but the final Energy Forum assignment grade can be e.g. 4- (=3.75)). Please also read carefully the assignment and Learning Diary instructions.

Deadline: Diary entry is due a week after the seminar was held (counting from the start time of the seminar)

### **Retaking the course or an assignment within it**

From Aalto [regulations](#) [emphasis added]:

“Students may **retake a failed course** that is included in the degree requirements for as long as the course is included in the curriculum. Students may **retake a failed examination** or other failed study attainment provided an opportunity for repeating the examination or study attainment is available. Students may **retake a passed course**, or a study attainment included in it, **once** in order to get a higher grade, provided an opportunity for retaking the course or study attainment is available. When retaking a course, the mode of completion may be different from that of the original course.”

For AAE-E1000:

- If you failed the course, you can **either** take the full course again **or** redo the course project (as many times as necessary to pass).
- If you failed the course project, but passed the course, you may redo the course project (as many times as necessary to pass)
- If you passed the course but would like to attempt to increase your final grade, you can **either** take the course again **once**, **or** retake just the course project (also **one chance**).
- Energy Forum assignment and course project outline can only be retaken as part of taking the full course again
