

Energy Forum Assignment

Write short (100-200 words) *Learning Diary* entries on **six** Energy Forum seminars you attended. (see here for explanations what a learning diary roughly is:

<https://blogs.helsinki.fi/kielijelppi/oppimispäivakirja/> (in Finnish) ;

<https://humak.libguides.com/c.php?g=686372&p=4910489> (in English). See also the “Learning diary example” under “Materials”).

You can use the following as guiding questions in your discussion, or comment and reflect on other issues that came to mind during the seminar:

- How does the speaker perceive today’s energy related challenges, and her/his company’s role in solving them?
- What is your opinion on the speakers’ proposed solutions, do you feel they primarily reflect the strengths of the specific company, (future) market and societal demand or both? Why?
- What was particularly interesting? Why? What remained unclear?

Focus on **reflecting** and drawing your **own insights**, as opposed to just summarizing the content of the presentations – doing the latter can’t lead to the best grade. As guidance, assume that the reader has also seen the presentations – refer to and highlight specific points when useful, but do not explain in detail what was said.

Deadline: Each of the assignment is due within one week from the start of the seminar (i.e. 15:59 next week). Submissions through Turnitin.

Marking: Each of the six diary entries marked 0-5, see “Evaluation Summary” in “Materials” for the details.
