

## Feedback from the 3<sup>rd</sup> course session (Tuesday 27.9.2022)

I like, I wish – method / structure (given manually with sticky notes to the board)

### I like

- Group discussion, learning from peers
- Reflection on the topics we read
- Group discussion (open-ended)
- Subject-specific perspectives
- The red toolbox 😊
- Good time for group work and discussions
- I like the group discussions
- the small group discussion was useful
- Enjoyed the gallery round
- Demo of the jigsaw method was nice
- Nice to reflect on the reading material together
- Listening to others
- Perspective on topics we read
- Technique! Discussion!
- Engaging discussion with peers
- The jigsaw group work & gallery walk
- I liked the group work
- I learned a lot from the groups
- Group work a bit tight for time but good pace

### I wish

- More group discussion
- Discussion topics to be more well-defined
- More discussion with input from pedaspecialists

- Continue with groups
- More time
- Discussions with pedagogical experts
- Tea
- Coffee
- Learning more critical view & modern development of learning materials
- I wish more timely start, less interruption, so we will have enough time for discussion
- More time for the technique
- I wish for more concrete instructions on what to discuss
- That reading tasks would be divided and presented (summarised) in small groups. I think none of us had time to read all material thoroughly.
