The timetable of our sessions?

Course evaluation

- 45% Individual assignment
- 5% Classroom activity
- 50% Group work & presentation

Let's hear about
YOUR
urban experiences

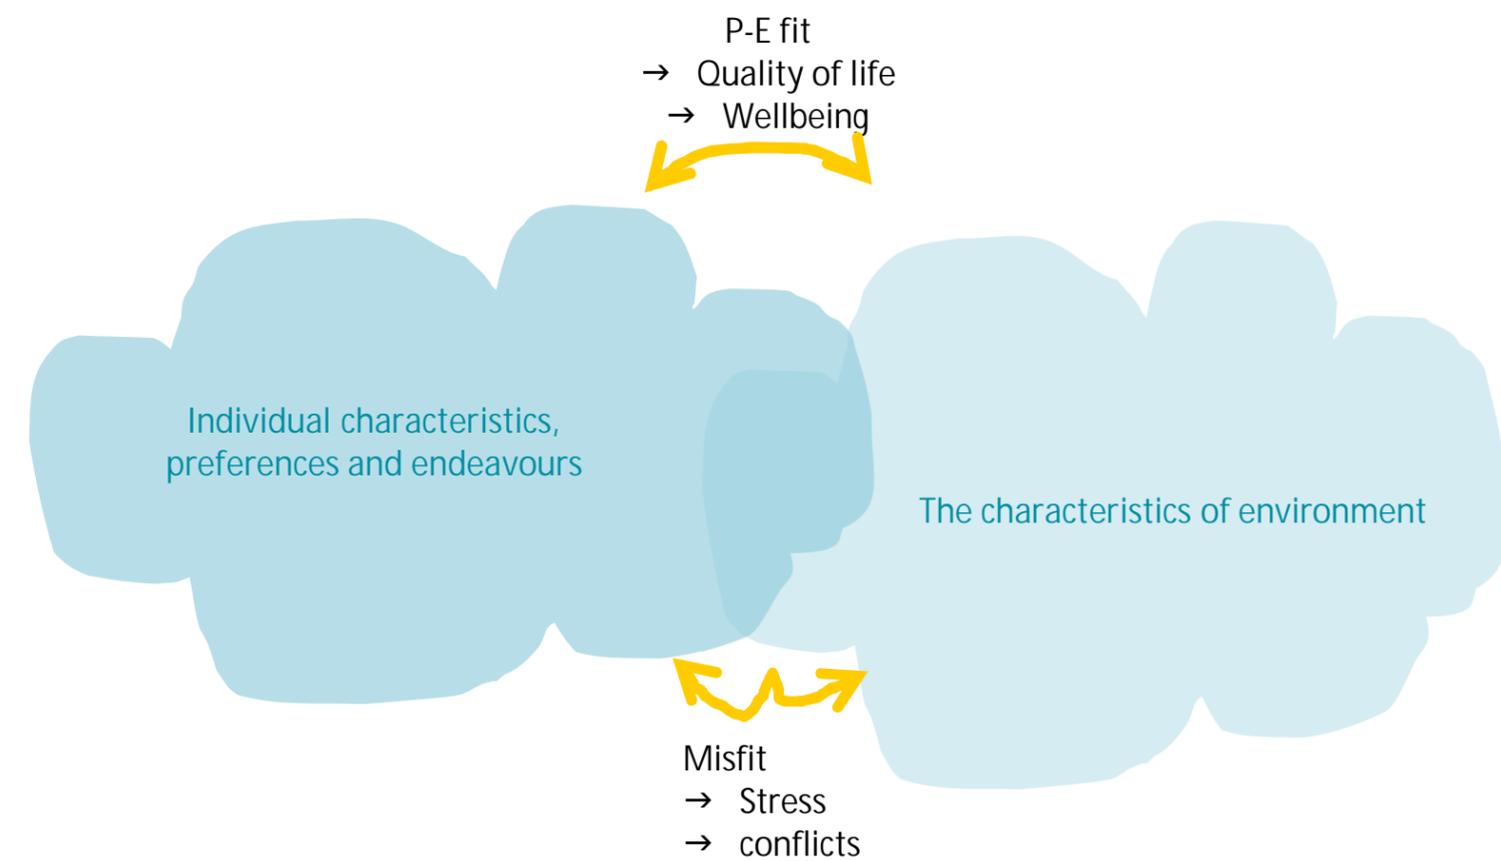

How about
my
urban experience ...

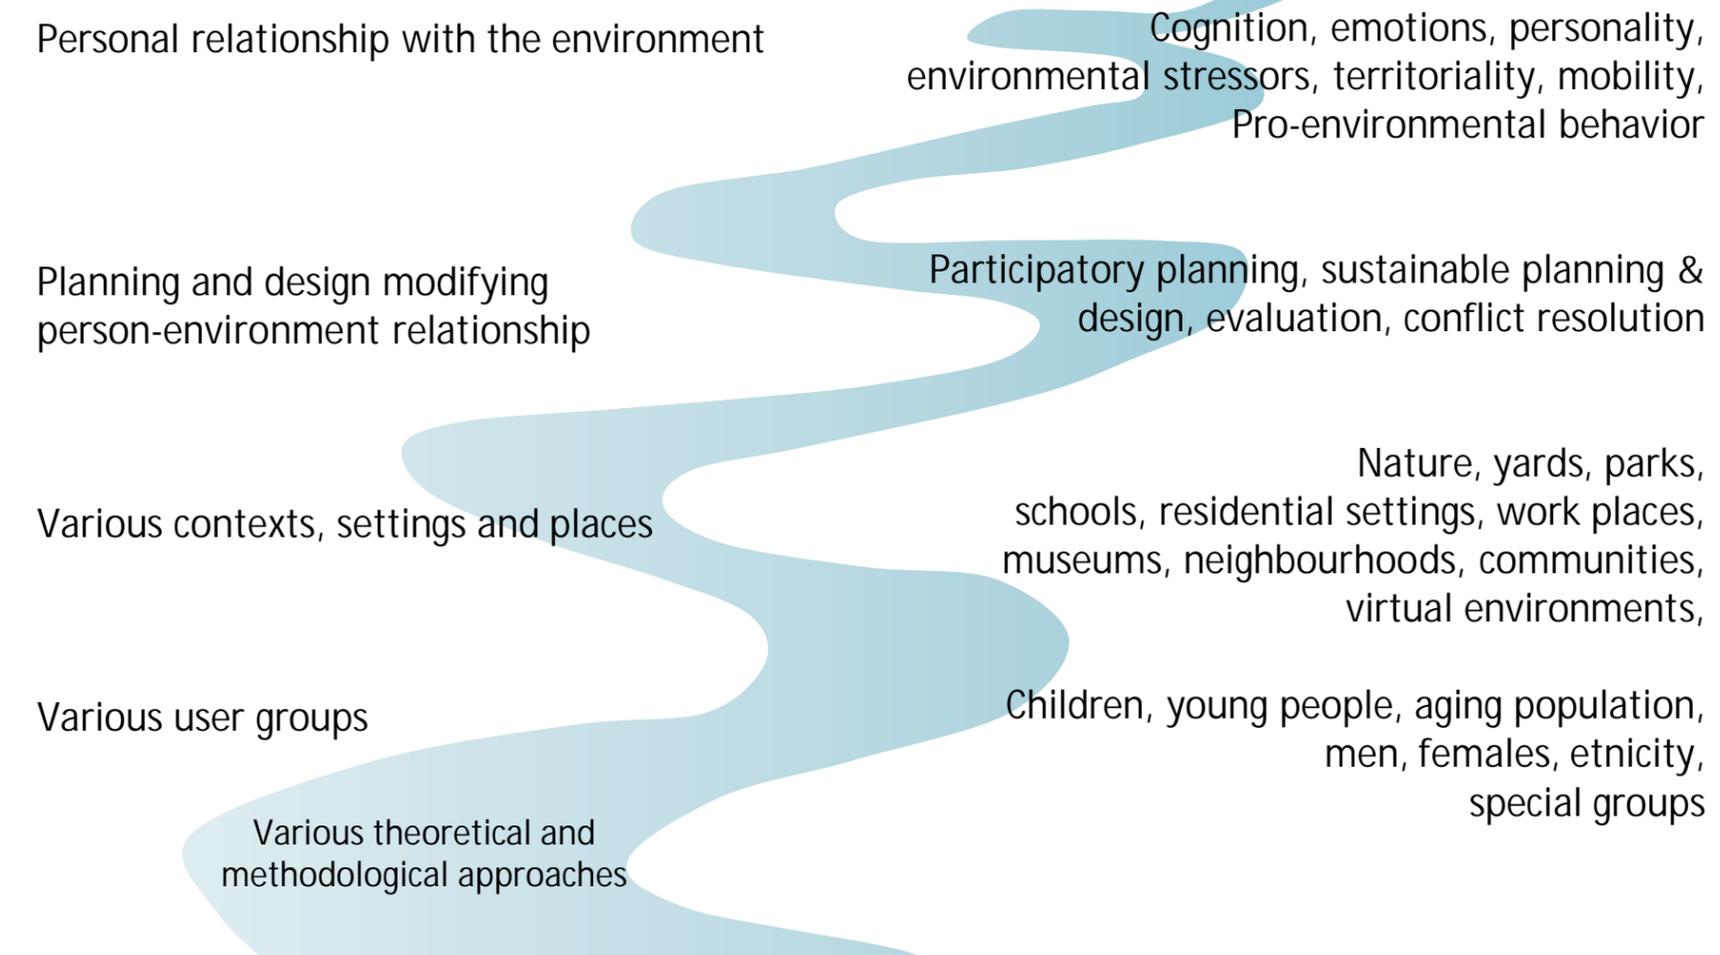

A short introduction to person- environment research

Person-environment fit as a basis of human-friendly environment

The research field of environmental psychology

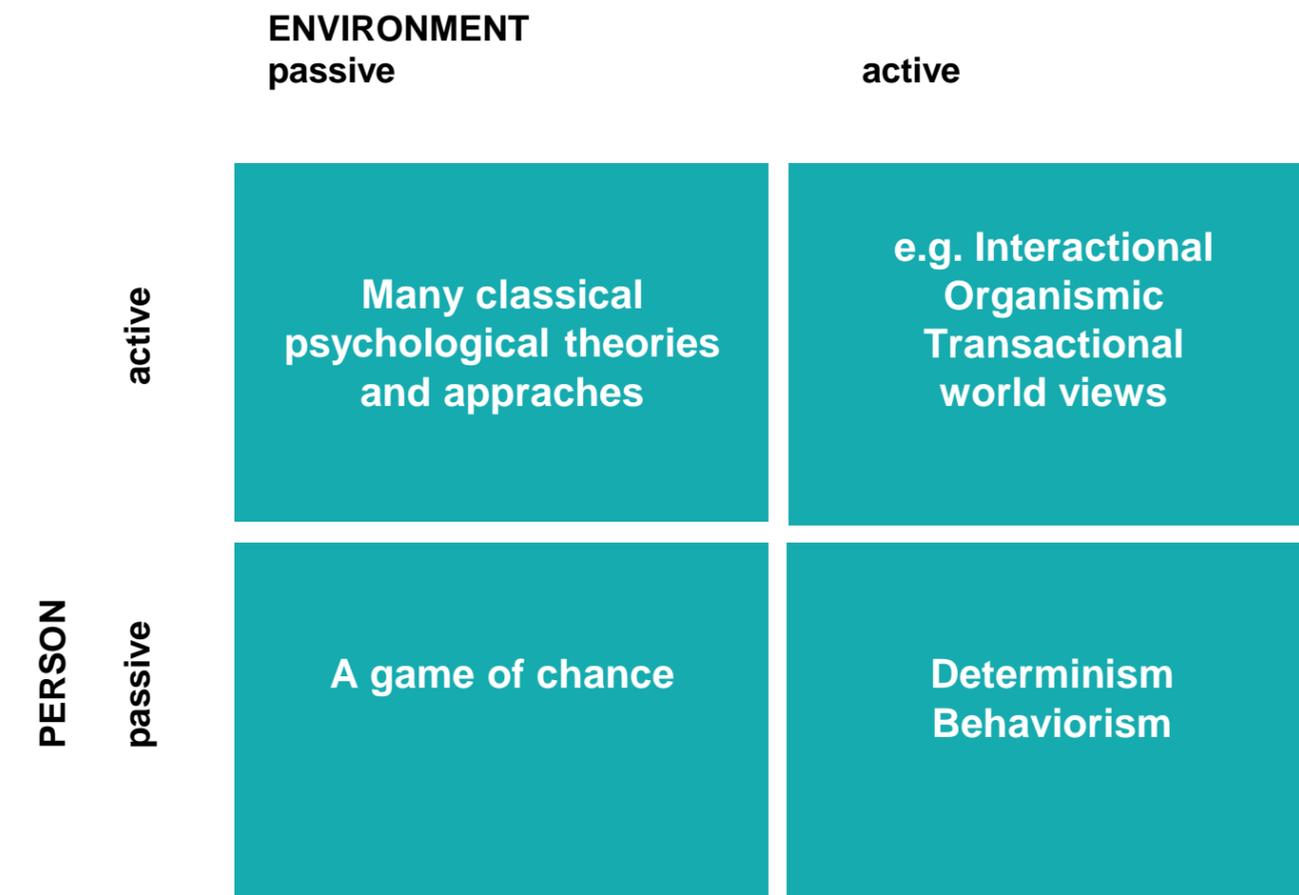

A few words about

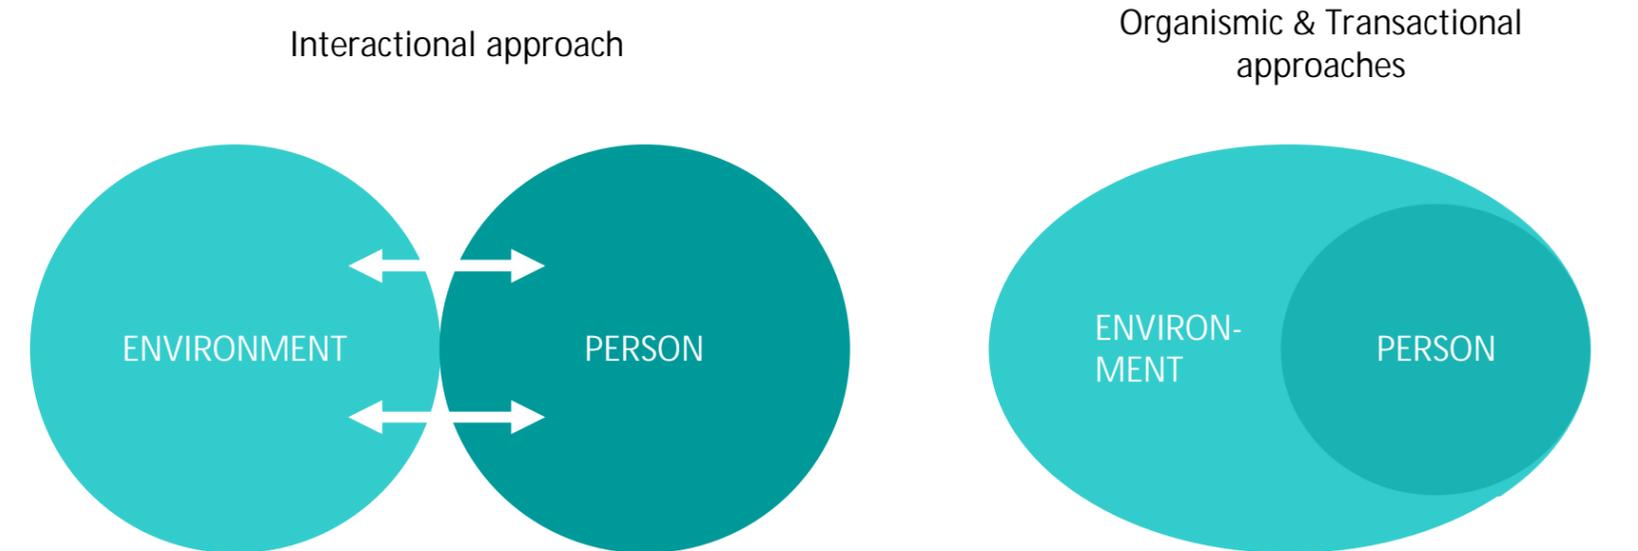

person-environment relationship

The active role of person and environment

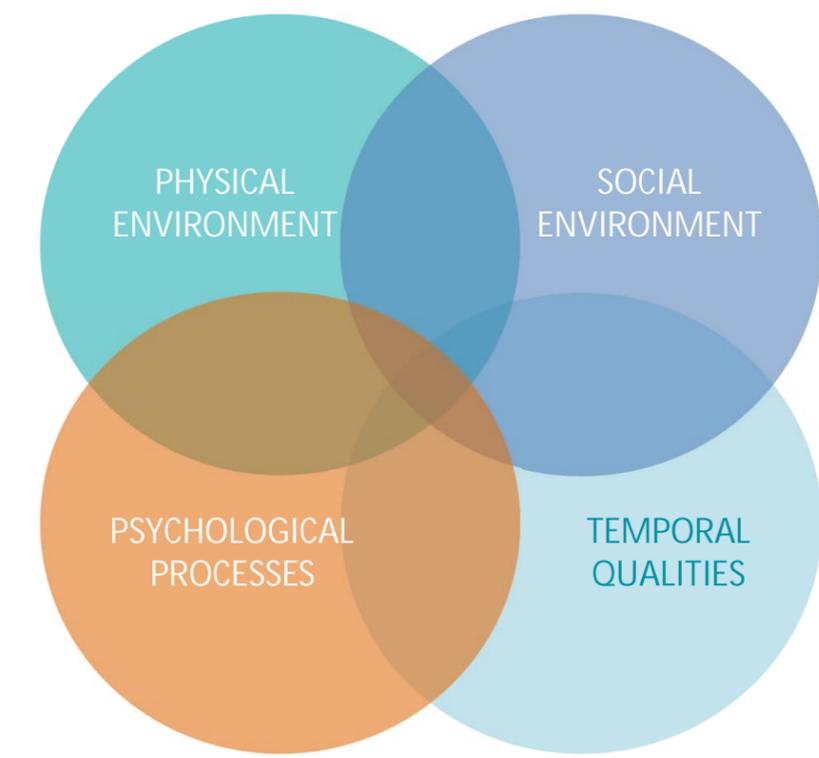

Various world views (Altman & Rogoff, 1987)

- | | |
|---|---|
| <p>ACTIVE ENVIRONMENT</p> <ul style="list-style-type: none"> • encouraging • directing • restricting attention and activities | <p>ACTIVE PERSON</p> <ul style="list-style-type: none"> • emotional • cognitive • functional • social levels |
|---|---|

Transactional world view (Altman & Rogoff, 1987)

Roger Barker's ecological social psychology

Behavior setting = a set of social codes of behavior in a given context (Barker 1968)

Person-environment relations defined by

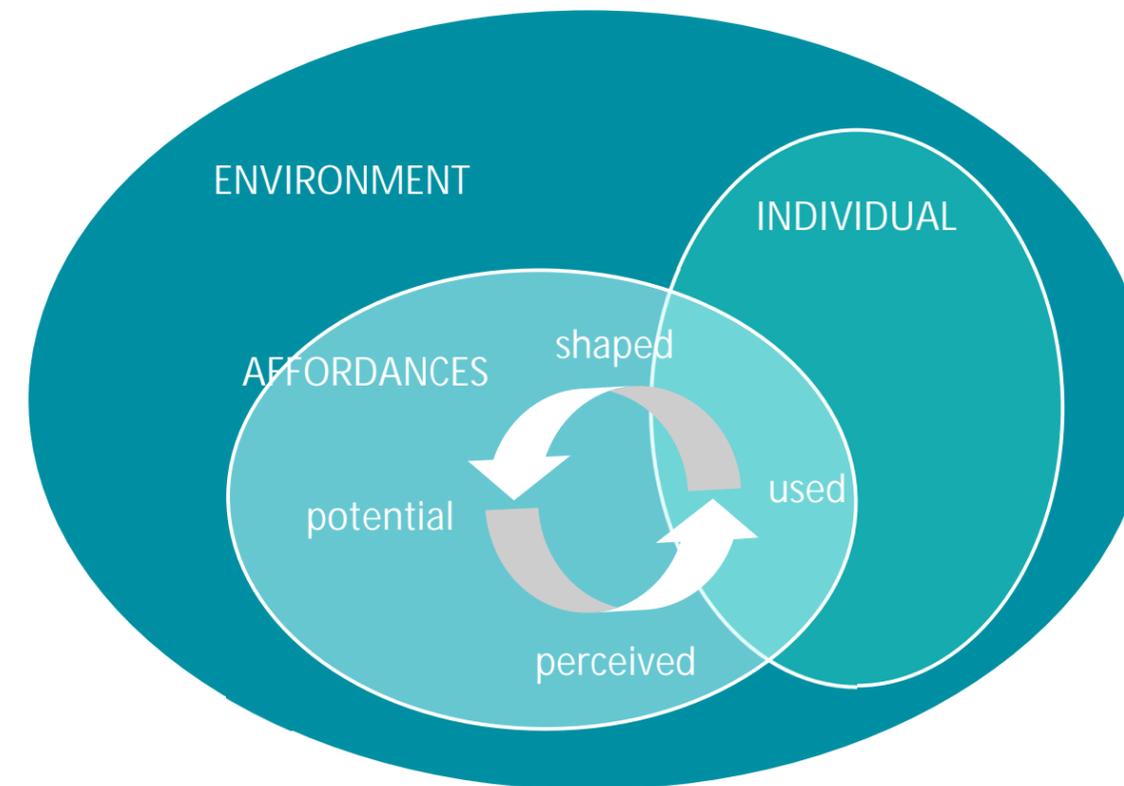

- Roles
- Customs
- typical activities
- Physical features

Examples of theoretical approaches that acknowledge the activity of both person and the environment

James .J. Gibson's ecological perceptual psychology

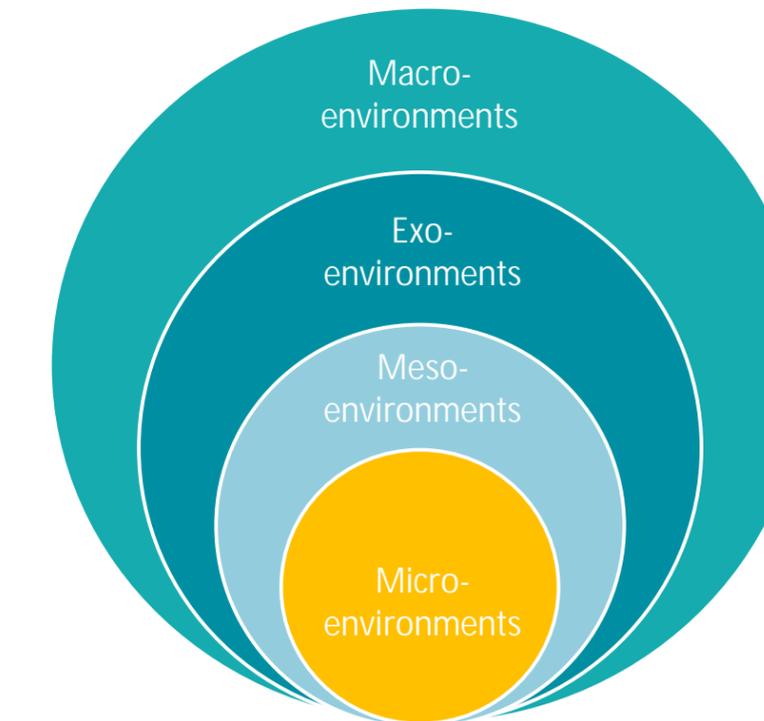

The affordances of the environment are what it offers the animal, what it provides or furnishes, either for good or ill. The verb to afford is found in the dictionary, but the noun affordance is not. I have made it up. I mean by it something that refers to both the environment and the animal in a way that no existing term does. It implies the complementarity of the animal and the environment. (Gibson, 1979/1986, p. 127) .

Urie Bronfenbrenner's ecological development psychology

Changed the famous equation by Kurt Lewin
 $B = f(PE)$

to a new form
 $D_t = f_{(t-p)}(PE)_{(t-p)}$

During the next two sessions we will learn about 6 themes relevant for human-friendly environments

Aesthetic experiences

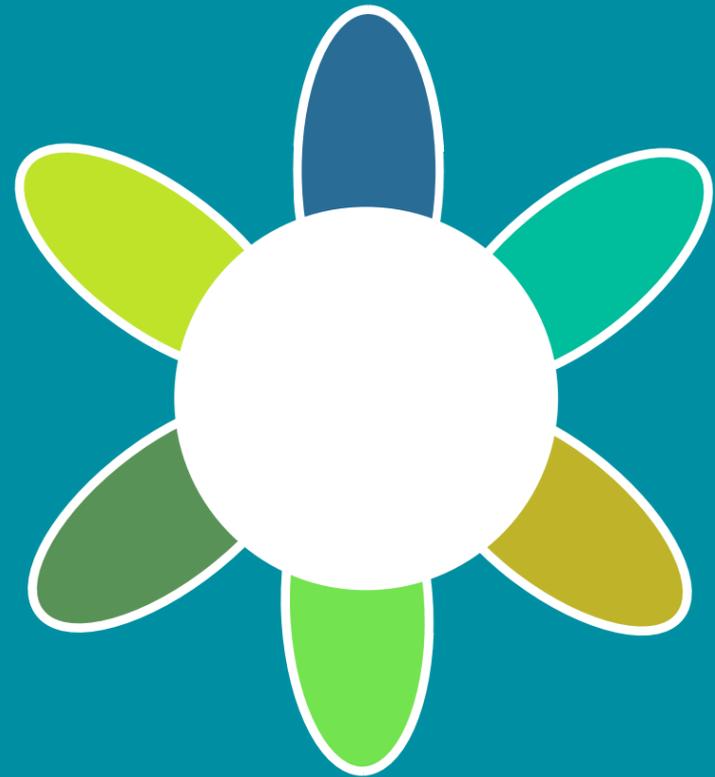

Sense of community

Place attachment

Perceived safety

Functional environments

Restorative environments

What next?

Group work 1

Next Tuesday	The following Tuesday
Perceived safety	Sense of community
Functional environments	Place attachment
Aesthetic experiences	Restorative environments

Group task instructions

You will study the ways scientific knowledge about the six themes can be applied in planning and design.

Prepare in groups a peer-teaching session about the theme that you have chosen.

You can use whatever pedagogical approach in the peer-teaching task. You will have 15 min time for your teaching session.

Pick the theme and:

- Watch the video lecture about the topic of your group
- Read additional material about:
 1. Studies and theories related to the theme
 2. About ways how to apply this knowledge in urban planning and design

The focus in the group work will be in the applications (item 2) but it is excellent if you deepen your understanding about the topic by reading additional material and present some parts of it in your session.

Use the studio-presentation format if possible!

Choose your group

- Lecture, 9.1.2023-26.2.2023
- Osallistujat
- Arviointit
- Osiot
 - » Welcome to study Urban Experiences
 - » Pre-task
 - » **Group task 1: Peer teaching**
 - » Group task 1 results: Peer teaching
 - » Group task 2: Analysis challenge
 - » Group task 2 results: Analysis challenge
 - » Individual course work
 - » Lectures
 - » Additional readings
 - » Interactive artefacts generated during course
- Oma etusivu
- Sivuston etusivu
- Kalenteri
- HSP sisäilöpankki
- Learner Metrics

Oma etusivu / Oma kurssini / spt-e5020 - u... / Osiot / group task 1... / Choose your group

Choose your group

Avattu: maanantai, 9. tammikuuta 2023, 13:33
 Sulkeutu: sunnuntai, 15. tammikuuta 2023, 23:55

Please choose which of the following six themes would you like to work? You can only choose one group. Be quick because each group fits only a limited number of students!

Valinta	Ryhmä Näytä kuvaukset	Jäsenet / Ryhmän koko	Ryhmän jäsenet Näytä ryhmän jäsenet
<input type="radio"/>	Group work 1: Perceived safety	0 / 9	
<input type="radio"/>	Group work 1: Aesthetic experiences	0 / 9	
<input type="radio"/>	Group work 1: Restorative environments	0 / 9	
<input type="radio"/>	Group work 1: Functional environments	0 / 9	
<input type="radio"/>	Group work 1: Place attachment	0 / 9	
<input type="radio"/>	Group work 1: Sense of community	0 / 9	

Second group work

- Happens in smaller groups
- Analytical challenge using a Public Participation GIS (PPGIS) dataset
- The analysis of place-based datasets from users of urban space. You will be PPGIS datasets collected for research purposes as well as for real life public participation.

What then?

Individual course work

- An essay about what you learned about urban experiences during the course
- You can start from thinking about your own personal urban experience, that you reflected during your pretask. Did you learn something about your own urban experiences and behavior?
- When possible, please try to find links to planning and design
- The deadline will be two weeks after the course has ended. It is excellent if you start the work already NOW 😊

The course pages

I will add contents to the pages as the course progresses

The timetable of the course

The lecture materials will come here
