

## Artist homes in Kirkkonummi

Some info of the excursion we've usually had on this course. The sites are of general interest as well and make a good outline for a day trip in the summer.

I recommend visiting these locations during the same day and in this order. They are quite close to each other, but for transport you'll probably need a car or bicycle. The first stop is an official museum, the second one can be visited any time of day. Both are examples of artist homes, *gesamtkunstwerks* in their own right.
