InstallShield			
< Back Next > Cance	1		

Choose as you like in the rest of the dialogs and wait until the installation is finished.

Start OriginPro from Windows programs menu. You should get the following dialog. Enter the Product Key you got from Origin in the e-mail then click "Activate":

License Activation	? <mark>×</mark>
If Activation fails due to firewall, web server or internet acc URL will be generated so that you can get a license manual	cess issues, a plain text ly.
Enter Product Key below and click Activate	Activate
Enter license text below and click OK	
	*
	Ŧ
	Cancel OK

If activation is successful, you should get the following dialog:

Attention!	
SUCCESS!	
Your license has been successfully activated on this computer.	
To move this license to another computer, you must first deactivate it. To deactivate your license, select Help:Deactivate License	
ОК	

If you already launched Origin without activating, you can do it later from menu Help -> Activate License...

You can also deactivate your license if you need to change the installation to another workstation (Help-> Deactivate License...)

If your license expires, you should be able to apply for a new one following the instructions at the beginning of this document.
