

WORKING WITH CHEMARTS

Recipes from the Cookbook

We encourage all teams to work with a list of selected recipes from the CHEMARTS Cookbook (bellow) as these are safe for you to work with at home, their ingredients are currently available in the lab and they are not too complex.

- 1 - Cellulose tubes
- 2 - Pine bark reinvented
- 5 - Hobby clay from cellulose
- 17 - Wooden transparency
- 20 - Patterning cellulose
- 25 - Bast fibres from willow bark

Main ingredients

Based on these recipes, the ingredients below will be available for you to explore. You are not restricted to work only with these ingredients, yet any other ingredient should first be discussed with the teaching team.

- Different kinds of cellulose pulp
- MFC
- CMC
- Pine bark
- Willow bark
- Cornstarch
- Fine wood powder
- Hemp
