

# Paper development workshop: Qualitative research

*January 15, 2021*  
*Prof. Nina Granqvist*

# Who am I?

- **Nina Granqvist, Associate Professor of Management**
- **Research addressing the emergence of novelty in market and fields, and tracing the transition of technologies and ideas from margins to mainstream**

# Meetings

On Fridays from 9-16 (end time tbc.), on the following days:

***Fri 15.1. at 9-12: Introductions, and characteristics of qualitative empirical research***

**Fri 12.2. at 9-16: Presenting empirical analyses and considering “what is this a case of”?**

**Fri 9.4. at 9-16: Theorizing from the empirical data (CHANGED DATE!)**

**Fri 14.5. at 9-16: Presenting and discussing your full papers**

# Course work and deliverables

- **Pass/ fail**
- **Presence and active participation in the workshop sessions**
- **Continuous development of the paper and presenting and discussing the next versions**
- **Providing written feedback for others after sessions 2 and 3**
- **After the last workshop session, provide extensive written reviews for full papers**

# Learning goals

- **Understanding different styles of and approaches to qualitative research**
- **Engaging with the craft and process of writing qualitative papers**
  - Conducting data analyses
  - Theorizing from the data
  - Integrating all the parts into a coherent whole
- **Giving and receiving feedback on papers, and writing reviews**

# Participants

**Joona Ruissalo, information systems science**  
**Carmelita Ginting-Carlström, entrepreneurship**  
**Tatsiana Padhaiskaya, marketing**  
**Anna Leinonen, communication**  
**Aleksi Soini, communication**  
**Henriikka Seittu, marketing**  
**Bernadetta Ginting-Szczesny, entrepreneurship**  
**Joona Koistinen, organization and management**  
**Valentina Arrieta, international business**  
**Sofia Villo, organization and management**  
**Elena Mazurova, information systems science**  
**Karoliina Auvinen, ARTS, design**  
**Ainomaria Parikka, marketing**  
**Sampsa Suvivuo, information systems science**

**Course assistant**  
**Tomi Koljonen, O&M**

# Introductions

Please, tell very briefly about your empirical paper project, max. 3 minutes (timed)

- What do you study?
- What is your data like?
- Do you have some initial observations based on the data? What are they?
- What literature(s) you might be using?

# Coffee break

# Let's discuss the readings

**What are the key characteristics of qualitative empirical papers?  
Your main takeaways.**

**Discuss in groups for 20 minutes.**

**Then let's discuss in further depth some points together.**

# Why qualitative research?

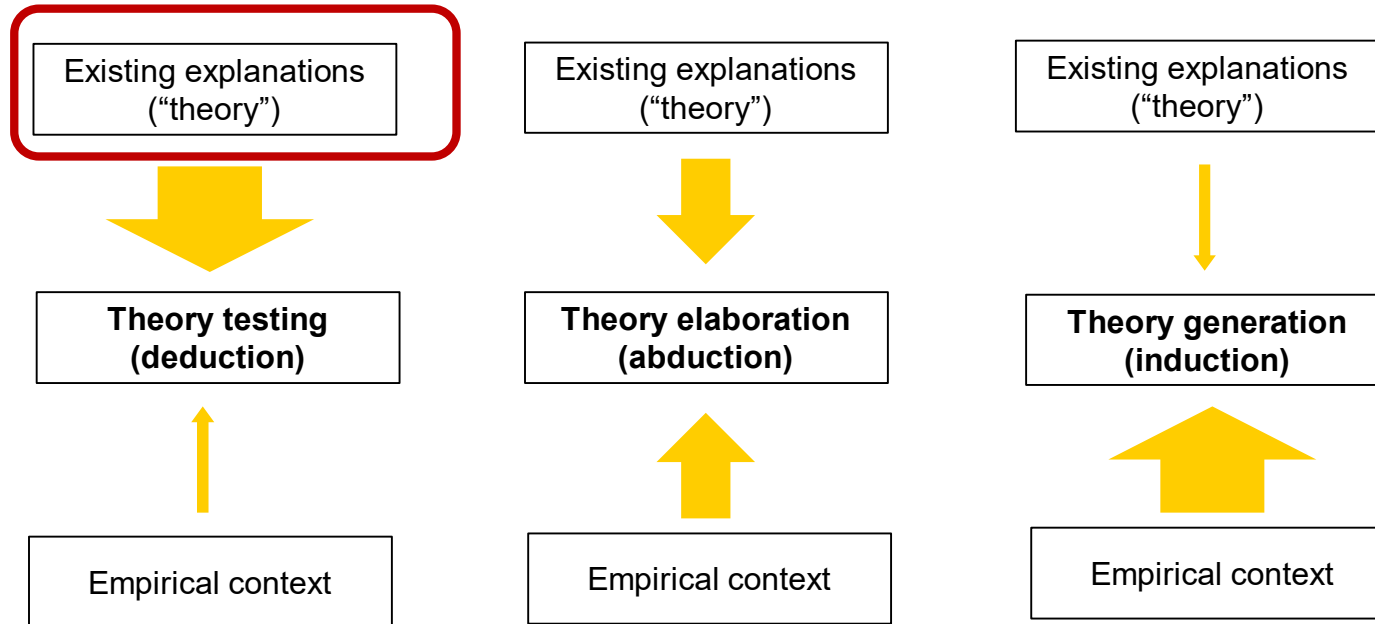

- ***“Why test theories when you can provide novel insights and understandings?”***
- **By its nature linked with theorizing as it often involves new conceptualizations and ways of making sense of empirical phenomena**
- **Qualitative work can be very powerful in terms of uncovering underlying processes and mechanisms**
  - Development of new theories, perspectives and insights
  - Important contributions – e.g. visible in best paper awards

# **Bansal & Corley (2012): What's different about qualitative research?**

## **Build theories inductively (data-driven analyses)**

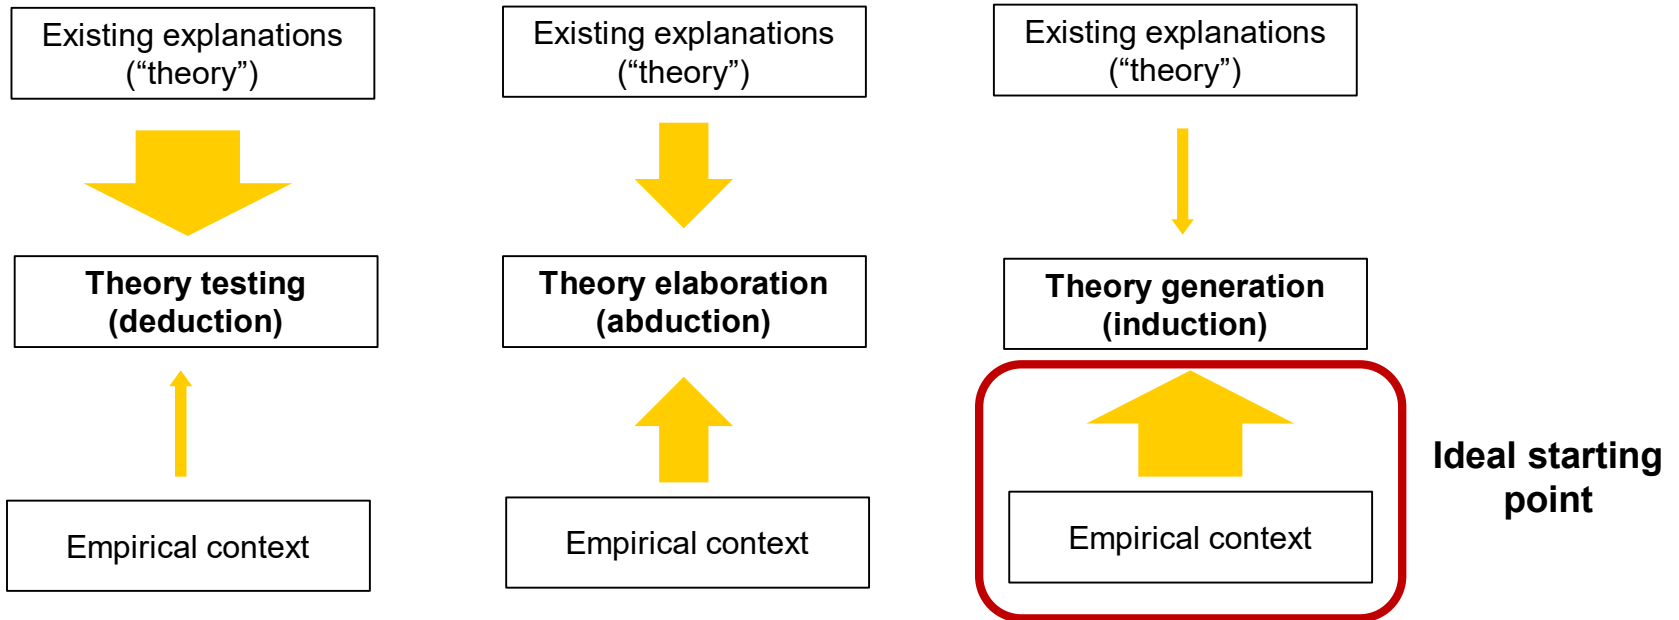

- **A short multipurpose front end (“hook”, gap, situated RQs, suitably deep, focused literature review)**
- **A long robust back end (strong discussion)**
- **Comprehensive, personal and transparent methods**
- **Creative data displays (how to show the data)**
- **Two narratives (data and theory) jointly contributing to an overarching story**
- **...all the best laid plans... embrace the process!**

# Theory driven design

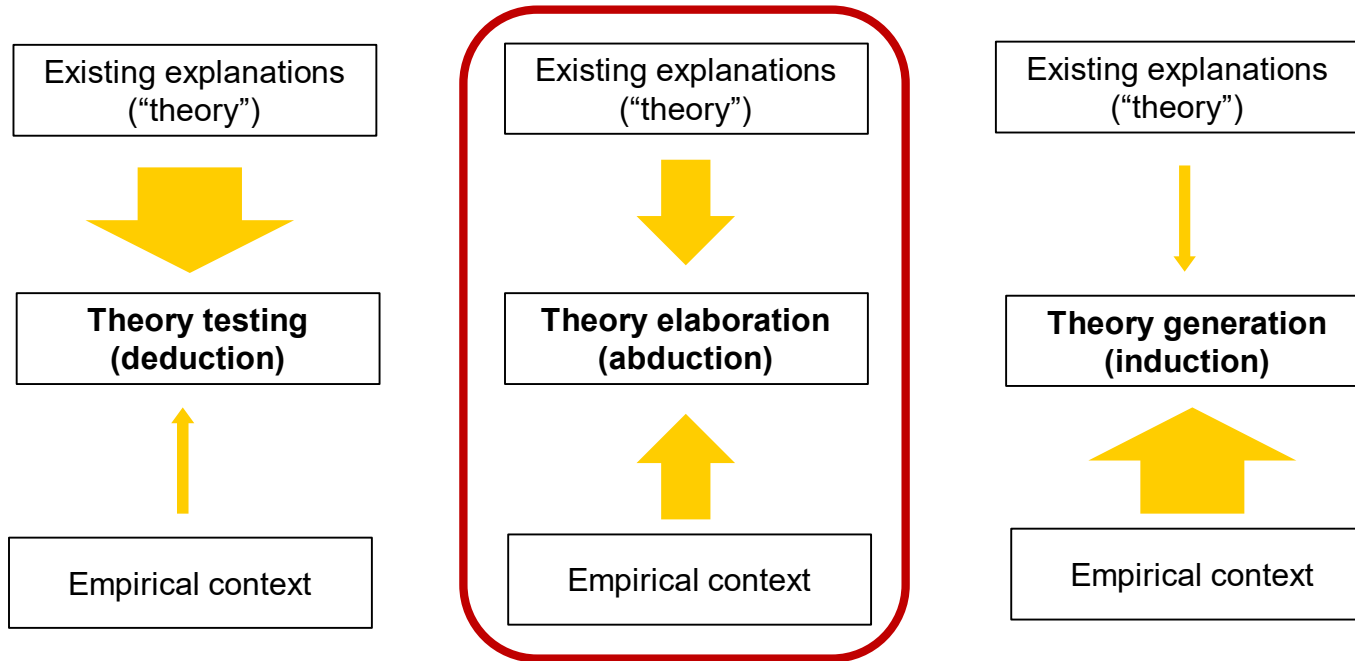

# The ideal of induction

*“Qualitative research is at its best when it develops explanations from empirical observations.”*

# In practice: Iteration between the literature and the empirics

# Eisenhardt, Graebner & Sonenshein (2016)

## Grand challenges with inductive methods

- **Inductive methods: generating theory from data**
  - E.g. cases, interpretivist studies, ethnography
  - All require deep immersion to focal phenomenon through rich data
  - Data-driven analyses (“grounded analysis”)
- **Novel ideas (openness + discipline)**
- **Explaining processes (how stuff happens..)**
- **Configurations, emergence and equifinality (“messiness”)**
- **Hard-to-measure constructs**
- **Extreme cases (opportunity to observe something occurring in particularly “rich depth”)**

# Eisenhardt, Graebner & Sonenshein (2016)

## Grand challenges with inductive methods

### Evaluating rigor and quality:

- Is the emergent theory internally coherent and parsimonious?
- Are the constructs or themes convincingly grounded in compelling data?
- Does the research provide rich and unexpected insights?

# Bansal, Smith and Vaara (2017)

## New ways of seeing through qualitative data

### Genres of qualitative work:

- **Variance-based case studies**
- **Process studies**
- **Engaged scholarship**
- **Historical studies**
- **Discourse studies**

### Publishing across genres:

- P #1: Know your **epistemology**
- P #2: Ensure that the research questions, data, and analysis are **consistent**
- P #3: Be authentic, detailed, and clear in **argumentation and style** of writing
- P #4: Use **exemplary papers**, but **do not force fit** your scholarship with existing templates

# Publishing qualitative empirical papers

# Example of top American journals: Acceptance rates in AMJ

- 1. Desk rejects: about 35-40%**
  - 2. Revise and resubmit: about 25-30% after review**
  - 3. 1st revision: about 50% chance of acceptance**
  - 4. 2nd revision: about 80% chance of acceptance**
- At AMJ about 20 % of submissions are qualitative papers and about the same percent of the publications as well**
  - Acceptance rates are similar for qualitative and quantitative papers**

# Examples: Host of other great journals in management

- Administrative Science Quarterly
- Strategic Management Journal
- Organization Studies
- Organization Science
- Journal of Management Studies
- Journal of Management
- Organization
- Human Relations
- Journal of Business Ethics
- Scandinavian Journal of Management
- Etc..

**What are the key journals in your discipline?**

# Next time(s): Data analyses and “What is this a case of”?

- Deep dive into the data
- Initial theorizing from the data
- What is the phenomenon that I observe? How can I position and theorize it in terms of the existing literature(s)?
- Also considering the explanations that have not yet been (exhaustively) presented

# Example: Temporal institutional work (Granqvist & Gustafsson, 2016, AMJ)

- **After some analyses .... an empirical observation: The change process proceeded more rapidly than anyone could have assumed and took all by surprise!**
- **What is this theoretically a case of, how to explain theoretically what I observe in the data – can be many things!! (E.g. Kotter’s steps to manage change processes ... too obvious!)**
- **What does the data tell? A lot of data on temporality of the process across different informants..**
- **This is about temporal institutional work! That is, constructing binding and normative understandings about time. E.g. constructing windows of opportunity, inevitability, etc.**
- **The paper developed a new approach to “institutional work”**

# Fri 12.2. Presenting empirical analyses and considering “what is this a case of”?

- Read as soon as possible Gehman et al. (2018): Finding Theory-Method Fit (in MyCourses)
- Focus on writing the empirical analyses and consider what your analytical approach is; What is going on that need explaining? What are the possible explanations in the literature? What is less known? What does your data tell or show?
- [Note, sometimes to follow the hunch you need to collect more data]
- Deliverable:
  - Next version of your analysis section. You do not need to have a “ready” and full **analysis** – but **make focused progress** on this. Your paper can also have other parts as you like (e.g. theory).
  - You can consider your approach for empirical analyses as per Gehman et al. (2018) and the materials for today, or other materials
- Submit your paper by Monday 8.2. in the Dropbox (link provided later)
- Guidelines for presenting your ideas and providing feedback follow

**Questions, issues  
to discuss?**

---
