Place attachment

- focal concept in the people-place research
- emotional bond between a person and a particular geographical location

rootedness

Giuliani & Feldman (1993):
The most important challenge for
researchers in this area of inquiry is
to integrate different viewpoints
and approaches.

Hernandez et al. (2014):
Since the first works in the field, the
number of different conceptual
frameworks is indeed colossal.
Still today... insuccient progress [has
been] achieved.

Happy places

"Willi Elfvik and the surrounding nature, nearby areas and trails – There we have walked around for years, enjoyed with kids and animals, grieved my fathers death, taken the therapy children to recover"

"This location means the whole Paloheinä forests and fields altogether. I exercise here around the year (cross-country ski, nordic walking, practise orienteering) and I always go home glad."

"Our dog Winston is happy here where we walk"

"Peaceful oasis"

"Beer and music"

"Such a nice area that should be kept as it is. Nice place for jogging"

"The center. People, cafes, urban atmosphere, old buildings, parks."

Helsinki is the city of sea. Sea has always been an important element for me.

As a former dweller, the center when I like in the "countryside" by the border between Helsinki and Vantaa. Most often this visit means nowadays Espoo surroundings but sometiems also Kallio.

the market place is full of life and international atmosphere. It is pleasant to walk around even if you are not going to buy anything.

Finally

Key blind spots in place attachment scholarship:

- (1) Sensory or immediately perceived meanings are not taken into account
- (2) Little attention is paid to how place meanings are the joint product of attributes of environmental features and the attributes of the individual
- (3) The assumption that the relationship between place attachment and behavior is linear and not constituted in dynamic relations among mind, culture, and environment.
