

Building Presentations & Tips for Presenting

Markus Joutsela 19.3.2018

Show the evolution and source of your thinking

Structuring the work

Sharing the workload

- What is the overall narrative of our team work?
- Who is in charge of compiling pics?
- Who is responsible for texts?
- Who embeds background research and evidence from user tests?
- What feeling do I want the audience to have in the end and how should I prepare my presentation in order to achieve this?
- Who says what in the presentation, how do we make as smooth and dynamic as possible?
- Who takes the lead?

Presentation skills

External factors

- performance, habitus
- interactional style
- practical skills:
 - rhythm of speech
 - variety
 - show and tell to convince
 - use of examples and evidence
 - use of space
 - technical skills with equipment

Internal factors

- substance expertise
- design thinking and empathy
- apprehension of the context
- ability to adapt to changing circumstances

Attitude

– same same but different

Positive

- I feel good.
- What a nice audience. It is nice that these people want to hear what I have to say and see what I have done and they have taken time off for me
- I am well prepared and not in a hurry
- I want to share my thoughts and vision and help my audience understand
- Discussive presentation

Negative

- I feel anxious and nervous
- What are those people looking at. What do they want from me.
- I am late and in hurry
- I want to get this soon over with
- Reporting
(one-sided monologue)

Technical

- Does the timing of our presentation work?
- Resolution of pictures?
- Do the fonts and contrast work in the presentation?
- Does the projector and connections work?
- Do the files work?
- Do the links work?
- Does the sound work?
- Preparation of the space for presentation, chairs, tables, lighting, cables, equipment etc.
- Any other possible needs, papers, physical mockups, microphone, props, stagelights etc.

**Presentation advice from
industrial designer
Pekka Murto**

Audience

iPhone

Apple reinvented the phone

Objective

Audience

- Who are they?
 - Primary, secondary, gatekeepers, decision makers
- What do they know?
 - Experts vs. novices vs. mixed
- What is their attitude?
 - Positive/neutral vs. negative
- How can you motivate them?
 - Stress benefits & enhance credibility (rank, goodwill, expertise, image, common ground)

Objective

- Informational vs. promotional/persuasive
 - Or something in between
- Making the audience agree or act in a way we want to / creating buy in = persuasion

Some principles...

Common problems (Alexei Kapterev)

Incomprehensible
structure

Lousy
slides

Sleep-inducing
delivery

Presentation principles (Alexei Kapterev)

3 PRINCIPLES (not rules):

Focus

Contrast

Unity

(...in structure, slides and delivery)

Structure

- Focus on the main objective
 - Support with key points
 - Drop the rest
- Problems – solutions

Why / How we
MADE IT?

COMPETING PRODUCTS
Y AND Z ARE LIKE
THIS

WE HAVE THIS
GREAT PRODUCT X

X IS WAY
BETTER THAN
Y OR Z

THIS IS HOW
X, Y, Z COMPARE

Why YOU SHOULD
GET / INVEST IN
X?

Motivated sequence (Ehringer & Monroe 1987)

- 1 – Get attention – arouse interest, focus on message
- 2 – Show the need – identify the problem
- 3 – Satisfy the need – present a solution
- 4 – Visualise the results – point out the benefits
- 5 – Request action – obtain commitment

AIDA

- Attention
- Interest
- Desire
- Action

WE HAVE THIS
GREAT PRODUCT X

WHY / HOW WE
MADE IT?

COMPETING PRODUCTS
Y AND Z ARE LIKE
THIS

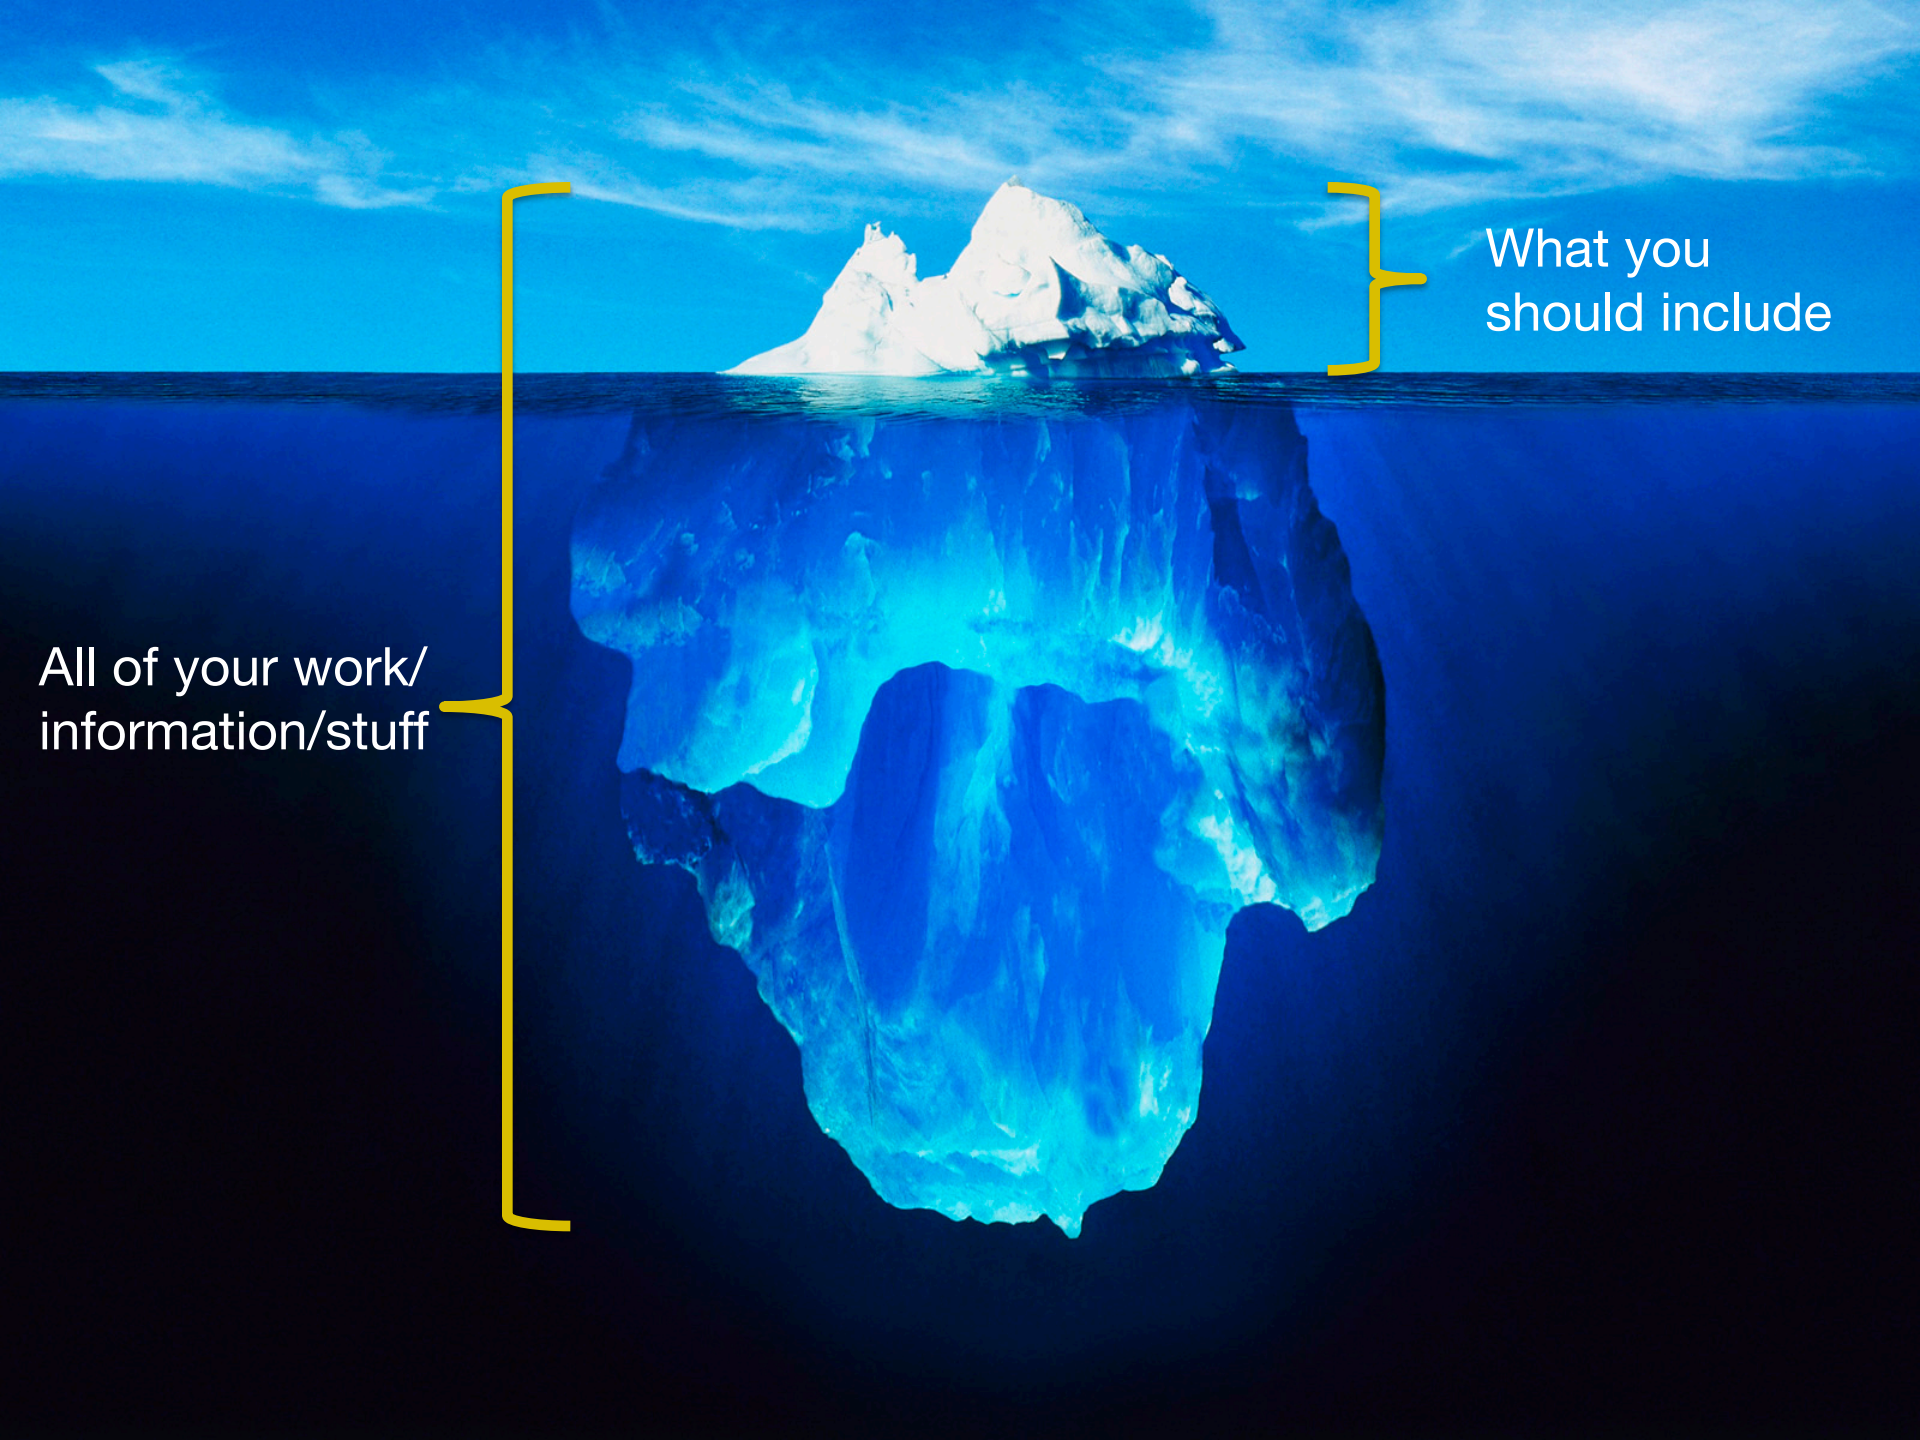

THIS IS HOW
X, Y, Z COMPARE

X IS WAY
BETTER THAN
Y OR Z

WHY YOU SHOULD
GET / INVEST IN
X?

Slides

- Avoid excessive use of text, unnecessary clutter, pictures for pictures sake or too much information
- Indicate how your things relate to people
 - Scale, use & how things work
- Anticipate objections and questions
- Slides support you, not the other way around

What you
should include

All of your work/
information/stuff

WE HAVE THIS
GREAT PRODUCT X

WHY / HOW WE
MADE IT?

COMPETING PRODUCTS
Y AND Z ARE LIKE
THIS

THIS IS HOW
X, Y, Z COMPARE

X IS WAY
BETTER THAN
Y OR Z

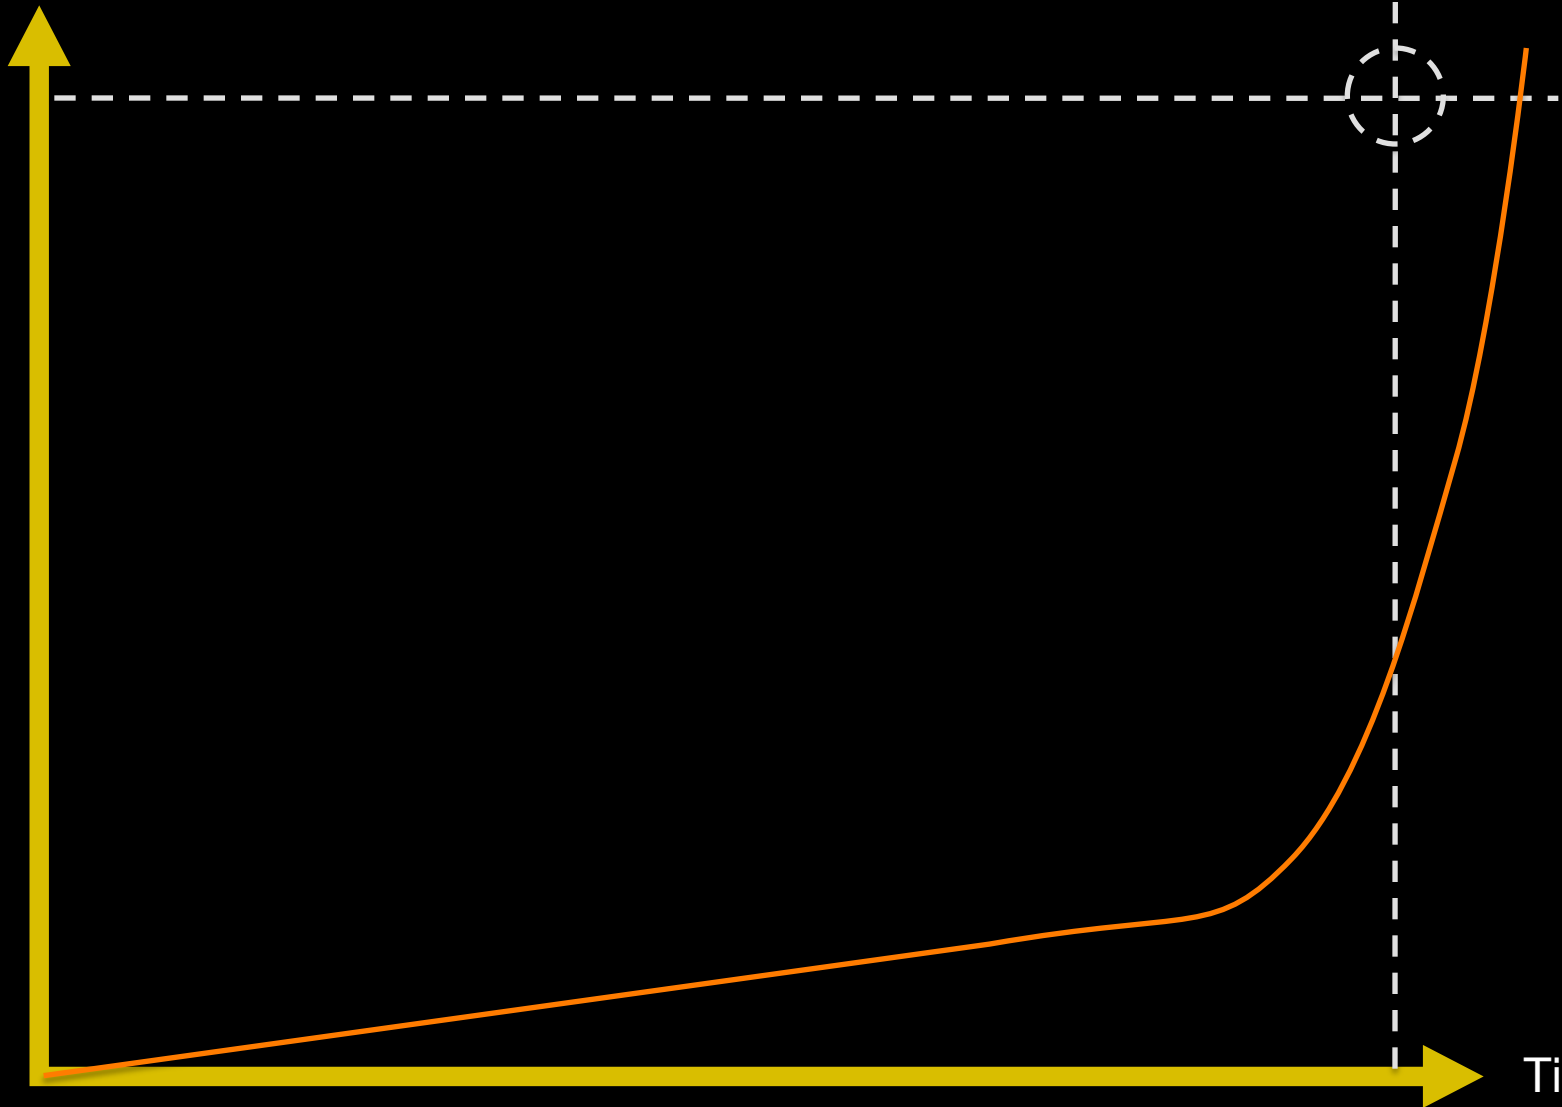

WHY YOU SHOULD
GET / INVEST IN
X?

Delivery

- Do practice and annotate but don't overdo it
 - "Act natural"
- Mind the stage and audience
 - Roles may help
- Prepare for Q&A (and anticipate objections)
- Keep the attention
 - Reserve time and attention for prototypes
- Timing!

Content

Time

Content

Time

Example: iPhone launch

Building interest, getting attention

"This is a day I've been forward to for two and a half years..."

"Every once in a while a revolutionary product comes along that changes everything"

iPod

Phone

Internet

1984

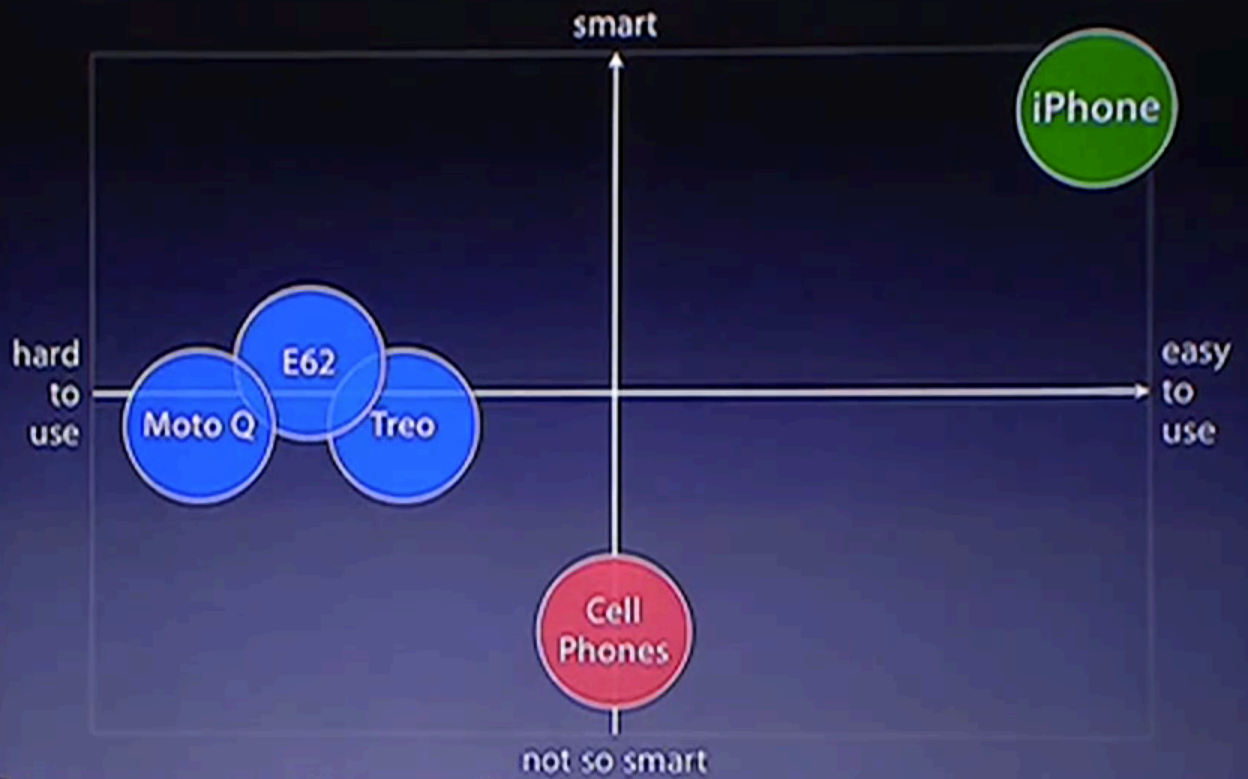

2001

Building credibility & trust

"Apple has been able to introduce a few of these..."

The problem (+building even more interest)

Moto Q

BlackBerry

Palm Treo

Nokia E62

The problem

How to solve it? (As well as showing some past Apple success...)

The solution

Who wants a stylus?

Another problem: The stylus

Another solution: multitouch

Works like magic

No stylus

Far more accurate

Ignores unintended touches

Multi-finger gestures

Patented !

Why multitouch over the stylus?

Revolutionary User Interfaces

Mouse

Click Wheel

Multi-Touch

Building more credibility & anticipating objections (they've done revolutionary user interfaces before...)

Revolutionary User Interfaces

Mac

iPod

iPhone

Revolutionary interfaces -> revolutionary products

Design

Something wonderful in your hand

Moving onto the features (but no contrast!)

”Let’s go and turn it on...”

Notes

- Clear main point: "selling" the iPhone as a revolutionary breakthrough product
- Clean slides (even a bit too clean at times)
- Problems – solutions
- Use of questions for addressing objections / doubts
 - "Who wants a stylus?"
 - "Why do we need a revolutionary UI?"
- Past success -> Enhancing credibility and addressing doubts
- Challenges the audience (although in a quite safe environment...)

Summary

- Who is your audience?
- What is your objective?
- Does your structure, slides and delivery have...
 - ...focus?
 - ...contrast?
 - ...unity?

Check list

- Speak to audience not to screen
- Speak slowly enough and use you whole mouth!
- Ask if anyone have questions
- Remember culture differencies
- Note your body language and posture; if you are looking depressed no one believes you
- Stand right and use hands and gestures for your help
- Be realistic: normal positiveness is enough
- Also clothing can be read as message
- Keep the main message clear! Repeat if unclear things.
