RefWorks reference manager

Kirsi Heino

Information specialist

Reference managers

- RefWorks
- EndNote
- ProCite
- RefManager
- Citavi
- Zotero
- CiteULike
- Mendeley
- JabRef...

What is the use?

- In-text citations and bibliography automatically
- Search results in one place (editing, notes and attachments)

RefWorks vs other reference managers

- Web-based
- Library provides programme and training
- Help available from Kirsi Heino

RefWorks registering

- <http://libproxy.aalto.fi/login?url=http://www.refworks.com/Refworks/>
-> Sign Up for a New Account

Importing references

- Do a search in database, select references and click RefWorks icon.
- When RefWorks icon is not available, follow the import instructions (Help -> Launch Help File ->Getting References Into Your Account ->Importing From Online Data Vendors).

Attachments

- Attachments can be added to RefWorks references.
- Searchable
- Default disk space / user account 100 MB, by request can be added to max 5 GB
- One user can have several user accounts.

Self studying hints

- [LibGuides](#)
- [RefWorks Community](#)
- Help / Launch Help File

Write-N-Cite (=ProQuest)

- RefWorks references in use with Microsoft Word
- The format of in-text citations and bibliography can easily be modified

Reference sharing

- RefShare
- Read-only-
Access
- Shared user id
and password

RefShare

- For sharing the references
 - as link or RSS feed
 - folder, whole RefWorks database, attachments
 - user rights (printing, exporting, generating bibliography, commenting)
