Personal budgeting & Mobility

In collaboration with:
Ministry of Social Affairs, THL, Kela,
Espoo Mobility Support Services
& ORSI Research

In tandem with the broader social and healthcare reform in Finland, the Ministry of Social Affairs launched a pilot project on personal budgeting for people with disabilities (Henkilökohtainen budjetointi).

This new model aims at providing a more inclusive and flexible choice for persons with disabilities in order to give them access to an integrated offering, of private and public services, while also becoming more mindful of natural resource use.

Group A & B: focus on the development of a model for citizens with disabilities to become active members in co-defining the services they need, together with municipalities and providers.

Group C: focuses on the Mobility support services in the Western Uusimaa region. This initiative has the objective of reducing the carbon footprint of mobility services whilst providing improved yet cost-effective transport services that suit the lives of disabled commuters who use complex multimodal services.

Group A

Q&A

Iiro Toikka (THL)
Marjukka Turunena (Kela)
Sanna Tiilikainen (ORSI)

- **What was the most surprising insight?**
- **What would this proposal mean for government?**
 - What challenges do you see standing in the way?
 - How is this proposal different from what is traditionally done in government?
 - Who do you think could own this?
- **Any references of similar initiatives?**
- **What have you learned about this collaboration?**
 - Takeaways using human-centred and systems thinking
- **What could be studied further?**

Public Procurement Baby box

In collaboration with:
The Ministry of Economic Affairs
and Employment, Kela, & ORSI Research

The value of public procurement in Finland represents 15% of Finland's gross domestic product. An example of public procurement is the Kela Maternity box. Each year, Kela awards around 50,000 maternity grants, of which about 30,000 are provided in the form of a maternity package.

Businesses, administrative bodies and other organisations can reduce the environmental impacts of their operations, and also cut costs, by buying environmentally friendly goods and services.

Group A focuses on the redesign of a sustainable procurement process that supports today's overburdened procurers.

Group B envisions a simplified and collaborative procurement process for a carbon neutral state.

Group C explores the use of the Baby box as a vehicle to promote sustainable consumer behaviours.

Strategy for Expatriate Finns

In collaboration with:
The Ministry of the Interior,
Suomi-Seura & ORSI Research

The Ministry of the Interior will set a strategy for the expatriate Finns for the years 2022-2026. This new strategy aims to explore the sustainable means that can increase participation of expatriate Finns in Finnish society (politics, culture, education, employment). It also looks to broaden the representation and inclusivity of Finns who live, plan to move or are returning from abroad.

Group A explores the integration of the returnees in the Finnish society, with an inclusive and international perspective.

Group B examines the use of participatory methods in the strategy writing process to support government to adopt an expatriate-centred mindset.

Group C focuses on engaging the young expatriates by using context-based analysis and a participation taxonomy framework.

Group A Q&A

Marja Avonius (Intermin)

Tina Strandberg (Suomi-seura)

Mariana Salgado (Intermin)
