

NEPPI Week III

15.11.2021

Welcome!

Salu Ylirisku

Agenda

09:15 - 09:45

Reflections on the Hex Machine exercise

09:45 - 10:15

Grounding the second phase

Pause

10:30 – 12:00

The IoT Concept Design Project briefing

The background consists of a dense, 3D-rendered hexagonal pattern. The hexagons are arranged in a staggered grid. The color of the hexagons transitions from a light teal at the top to a dark navy blue at the bottom. Each hexagon has a slight bevel, giving it a three-dimensional appearance with shadows and highlights.

Hex Machine Reflections

Learning goals

- Hands-on experience with **low-fidelity prototyping** materials and electronic components.
- Hands-on experience of **iteratively** building an IoT device that functions physically in a local setting while interacting with an online service.
- Concrete experience of how IoT devices are built of physical and interactive **components** of different kinds.
- Know that IoT devices always network through **specific interfaces**.
- Know that IoT services are typically built on **specific platforms**.
- Know that there are **many ways** of achieving the same result in order to satisfy requirements.

socket_server.js — WebApp

EXPLORER

OPEN EDITORS

- JS socket_server.js U
- JS hexagon.js modules U
- JS hexmap.js modules U

```
JS socket_server.js > wss.on('connection') callback > incoming
180 /**
181  * GUI
182  */
183 } else if (message.toString().includes("gui_admin")) {
184   if (message.toString() === "gui_admin_page_loaded") { // logger page reloaded
```

Reflecting on the experiment

- What did you learn?
- Write 10 things individually (5 minutes silence), let's then discuss in small teams (5 persons in breakout rooms, 10 minutes), and then share the key insights from each team

What did we learn?

- Ok to record? If not, please, send a private message
