14:06:37 From Samvidh Ramanathan to Everyone:
@federico what's that product in the corner of your room :P
14:07:14 From Samvidh Ramanathan to Everyone:
Looks interesting
14:08:32 From Elise Hodson to Everyone:

Dongmei - what other objects have you found like this? That intentionally simplify technology or reduce use/complexity? are you interested in other alternatives to mainstream tech, e.g. fair phone?

14:09:13 From Federico Fiermonte - CoDe to Everyone:

@samvish actually an old African arch 😊

14:11:07 From Dongmei Gao to Everyone:

Elise - I tried to find similar products, but most of them are applications, such as tracking screen time. I'm still discovering more interesting products. The fair phone seems like good, I'll look up it.

14:12:05 From Elise Hodson to Everyone:

Dongmei - maybe look at phones for older demographics too - I know there are new 'seniors' phones' that are far simpler bigger flip phones

14:12:33 From Nicolas Robertson De Ferrari to Everyone:

Dongmei, aren't self-driving cars a liminal space in that sense?

14:15:22 From Dongmei Gao to Everyone:

Elise, yes, seniors phones have a similar concept

14:17:11 From Elise Hodson to Everyone:

Enni - did you see the sequined Adidas track suit currently at the design museum?

14:17:46 From Dongmei Gao to Everyone:

Nicolas - I think self-driving cars are liminal space too. I will consider more if it's suitable for my topic - digital minimalists

14:21:02 From Meyer Colin (s) to Everyone:

Janne: I'd really would be interesting on your thoughts about the future of Video Formats rather than the current state 😊

14:25:37 From Janne Melajoki to Everyone:

Thanks Meyer! Will be interesting to see will we find aspect ratios funny in future while everything is a screen or a digital surface. Or living in the metaverse

14:25:53 From Elise Hodson to Everyone:

When I flipped through the slides earlier, I had no idea what that image was Sofia! Nice questions

14:26:23 From Sofia Nissilä - IDBM (she/her) to Everyone:

thank you Elise :)

14:26:36 From Nicolas Robertson De Ferrari to Everyone:

reminds me of the collection derelict from zoolander 1

14:26:45 From Elise Hodson to Everyone:

classic

14:26:47 From Sofia Nissilä - IDBM (she/her) to Everyone:

+1

14:27:33 From Ninni Laaksonen to Everyone:

Sofia- its also interesting how these YouTube channels for children play with the algorithm by using popular characters so they pop up in the kids recommended ! That leads also to these weird videos with sprderman and elsa videos :D

14:28:11 From Sofia Nissilä - IDBM (she/her) to Everyone:

yup, I've been looking into those! :D they're so absurd

14:29:50 From Colin Meyer FACT to Everyone:

@Sofia: Maybe the Coco Melon phenomenon could be interesting as well, addicting children using certain sound frequencies...

14:30:04 From Sofia Nissilä - IDBM (she/her) to Everyone:
thanks Colin :) I'll look into that.

14:33:50 From Nicolas Robertson De Ferrari to Everyone:
The Cocomelon phenomenon is impressive, it hooks kids like a drug; and now there are hundreds of youtube channels trying to emulate the same, considering than the turnover of cocomelon is something around USD 35m

14:35:32 From Nicolas Robertson De Ferrari to Everyone:
Nat, super interesting! there's also something similar with the average sizes of the uniforms for war pilots

14:35:52 From Ninni Laaksonen to Everyone:
@natalia- The book invisible women touches on this too! and how the 'female' crash dummies, if used, are not usually tested on the drivers seat

14:39:11 From Ruut Launo to Everyone:
anna can you share the link for that video? :)

14:40:50 From Anna Vienamo to Everyone:
Yes, here you go! <https://www.youtube.com/watch?v=SeLIOSgipz4>

14:40:58 From Ruut Launo to Everyone:

May I ask the attendance code for today?

14:55:18 From kazuki & Mante to Everyone:
In my childhood, I was living in online space, at least I felt so. That was my world, and I don't know what is the difference between meta verse and what I was in... that's what I'm interested in

14:55:25 From Elise Hodson to Everyone:
goodjobeverybody is the pw

14:55:37 From Yen Hien Hoang to Everyone:

15:08:42 From Brenda Vertiz (she/her) to Everyone:
what types of economies we are focusing on, excellent point delphine

15:12:21 From Brenda Vertiz (she/her) to Everyone:
the bacteria

15:14:17 From Brenda Vertiz (she/her) to Everyone:
we have less (quantity), and less (types) of “good” bacteria in or bodies than 50 years ago.

15:14:31 From Delphine Rumo she/her to Everyone:
In relation to the topics that question and address how to reconnect/deal with “nature” (house plants, bacteria or christmas trees) I would recommend this source which is a reflection on how have exotic and now domesticated and familiar plant species ended up in people’s homes and offices “Introduction | Special Section Plantarium: Human–Vegetal Ecologies”

15:14:52 From Delphine Rumo she/her to Everyone:
