## Information Policy Series

Edited by Sandra Braman

The Information Policy Series publishes research on and analysis of significant problems in the field of information policy, including decisions and practices that enable or constrain information, communication, and culture irrespective of the legal siloes in which they have traditionally been located, as well as state-law-society interactions. Defining *information policy* as all laws, regulations, and decision-making principles that affect any form of information creation, processing, flows, and use, the series includes attention to the formal decisions, decision-making processes, and entities of government; the formal and informal decisions, decision-making processes, and entities of private and public sector agents capable of constitutive effects on the nature of society; and the cultural habits and predispositions of governmentality that support and sustain government and governance. The parametric functions of information policy at the boundaries of social, informational, and technological systems are of global importance because they provide the context for all communications, interactions, and social processes.

For Allied Media Projects, a collaborative laboratory of media-based organizing whose transformative impacts will ripple outward for generations.

For Mother Cyborg and the Detroit Community Technology Project, visionaries of digital stewardship, DiscoTechs, and building the worlds we need.

For two-spirit people, who survived centuries of settler colonialism and are still here, reclaiming their rightful places beside the council fires.
