

Topic allocations for referee reports

If you see your name on the row corresponding to a topic, then that means that you have been assigned to write a referee report on that topic. You should submit the referee report on that topic through MyCourses before the lecture on that topic. If there are multiple papers in the list of papers for referee reports (in the reading list), then you can choose the paper you want to write on. Please read the guide on how to write the referee reports that is on MyCourses.
