Safer space principles

Let's act with respect for one another.

What does this mean in practice?

- **Benevolence principle:** Assume everyone present has good intentions
- **No assumptions:** Ask, if something doesn't seem right, or you don't understand something
- **Diversity of experience:** There is no right or wrong - everyone's experience is unique and valid
- **Allow space for different questions and opinions in conversations:** You don't have to agree with each other, but it is important to acknowledge different perspectives

Safer space principles are applicable throughout the training for participants and speakers.

More on this topic a little later in this presentation!

You can notify us about inappropriate behavior through the Zoom chat and also after the event via this form:

 - listen without taking sides
 - refer you to more suitable services if needed
 - brainstorm ways to resolve these issues with you
 - mediate discussions between community members
 - help you identify what counts as inappropriate conduct if you are unsure
 - support you if you wish to report a crime to the police
- *We cannot*
 - take sides or represent the views of either side of a conflict
 - punish anyone
 - demand and analyze evidence
 - tell others about the contents of our talks (without your permission)

Contact persons for

Fon Krairiksh & Lauri Jurvanen

hairinta@ayy.fi

We are often contacted in issues concerning sexual harassment. We can be a first point of contact, however

These matters should be reported to the police.
<https://poliisi.fi/en/report-a-crime>

How does advocacy relate to tutoring?

You are not alone with your group!

- **Consultation**
- **Support**
- **Doesn't matter if you are not a member, as long as you are part of the Aalto community**
- **Also, tutors play a huge part in AYY's EDI work**

Minority stress

- Students belonging to minority groups often face far more pressure to “fit in” than other new students
- Minority stress consists of, e.g.:
 - The experience of not being accepted as oneself
 - Regularly being challenged about one’s identity and experience
 - Negative self-image (due to negative messages in media, society, school, home, etc.)
- Can intersect in many ways with other minority identities and/or special needs, ie,
 - non-binary + disabled
 - black + Muslim + gay
 - foreign + has mental health issues

AYY anonymous minority stress reporter:
<https://forms.office.com/r/suXbWxXPBA>

EDI at AYY – three studies

- Hilla Back (2020)

International students

- included more systematically in academic settings
- excluded in social settings
- often linked to language

- Tommi Ostrovskij (2021)

International students experience structural challenges in several domains, including

- social
- psychological
- procedural
- linguistic

You can make
a difference!

- Fon Krairiksh (2021)

International students appreciate the following inclusion strategies:

- language choice
- explaining jargon, terminology
- explaining proceedings
- explaining customs
- main points in English, too
- tutors who actively invite them along to events

But sometimes things don't go according to plan, and students need a little extra help. What then?
