

AALTO
THESES

Challenge.

In Aalto Thesis, a multidisciplinary team of 2-4 students solves a Challenge provided by the Partner organisation through a set of Master's theses. We value challenge-based learning.

Coordination.

Aalto Thesis is a coordinated and project-based programme supported by the Aalto Thesis Team. We want to make this easy for everyone.

Collaboration.

Aalto Thesis is a unique possibility for multidisciplinary University-Industry collaboration. We believe that modern work *is* collaboration and co-creation.

Why Aalto Thesis?

Partner

- A multidisciplinary team of 2-4 graduating students
- Individual Master's theses
- The latest research-based knowledge from different and most relevant fields
- A tailored, multidisciplinary final presentation and summary
- The support of the Aalto Thesis Team
- Possibility to catch future talents to the organisation

Student

- Work-life competences: project work, multidisciplinary collaboration, teamwork, time management, and communication skills
- A motivating and accelerating project frame
- A real-life challenge and a ready-made partner organisation
- A paid grant of 5,000 €
- The support of other students in the team and the Aalto Thesis Team

Aalto

- Accelerating, motivating, and supporting the Master's theses → graduating students!
- Increasing multidisciplinary cooperation
- Boosting work-life collaboration
- Integrating work-life competences into education
- Work-life connections and research interests for thesis supervisors
