

Self-Check Propane Vending Machine

WHAT

Design a modular Self-Check Unit which enables customers to return empty cylinders and purchase new ones.

HOW

Enable customers to complete the cylinder transaction via Self-Check. Allow propane vendors to manage the process and check inventory levels remotely.

CASE

This is a concrete and challenging case to build a scalable product to the global market. Join our small team with a strong experience in the global automation market.

PROBLEM

Sales associates at retailers around the world are being interrupted for their productive work to change propane cylinders.
