

PART 1:

Your partner will start by saying a word in Finnish. It is one of the words on the left side paragraph (under “kuuntele”) in the table. Ask for repetition, if needed:

Voit sä toistaa? Can you say it again?

When you have decided which word it is say aloud the word on the right side of that word (under “sano”). Your partner tries to recognize that word in their paper.

Go on like this until you reach “loppu”. Make sure you have pronounced all the words before that. Start again if needed.

This time you will start by saying the first word in the right paragraph (*riisi*) in Finnish. Your partner should recognize that word in their paper. Go on like this until your partner says the task is finished.
