

## How to get your cleanroom access card walkthrough

In order to have personal access to Aalto NanoFab cleanroom, you have to get your cleanroom access card from VTT-Turvallisuusvalvomo, which is located in address: Vuorimiehentie 5 (access from Metallimiehenkuja side, see picture). The “Valvomo” is open 24/7, and your cleanroom access card is valid until 7pm every working day. You have to personally return this card back to Valvomo at the end of the week, or after the work is finished.

- **You must bring an ID!**

If you are going by car from Micronova, you can choose either the red-route or blue-route marked on the map.

Once you have reached Vuorimiehentie 5, you should see the G-stair doorway like in the picture below.

You can park your car like in the picture, or at the right hand side in front of the small brick building (in the picture you can see a corner of it on the right).

You should press the top most buzzer button "24/7 VALVOMO" and announce your business when somebody replies (you can say, ie. "I'm here for picking up my access card", or whatever you wish).

Note, that you are entering the building from the 2<sup>nd</sup> floor (the "G" door in image), and you should take the elevator to 3<sup>rd</sup> floor. Once exiting the elevator on the 3<sup>rd</sup> floor, somebody will come out from the opposing door to assist you.
