

EESS Course Final Grading of the Project

These are the grading criteria and point allocation for the final presentations and reports:

PRESENTATION (5min presentation + 5 min questions) (5 points)

- Presentation is kept within the time limit
- All members are involved in the presentation
- The topic is introduced and helps following the rest of the presentation
- The presentation highlights key aspects and conclusions
- Visuals support the message from the group
- The group is able to answer the questions after the presentation

Please, notice that some categories will have a stronger contribution towards the final grade of the presentation than others.

REPORT (max 10 pages) (20 points)

The assessment of the reports will be split into 5 sections, graded with a maximum 4 points each:

- Introduction and description of the consumption and production profiles
- Selection of storage technology, including scientific argumentation
- System design, component sizing and correct representation using the flow-effort notation
- Economical analysis, sustainability and conclusions
- Overall structure and quality of the report
