UNESCO Open Science Recommendation

**“As open as possible, as
closed as necessary”**

Aalto University Open Science and Research Policy

- **Open science increases impact of research conducted in Aalto**
- **Open science means open access to:**
 - Scientific publications
 - Research data
 - Methods
 - Software and code
 - Infrastructure

→ **Aalto University Open Science and Research Policy**

→ Open education coming soon!

→ **Open science and research | Aalto University**

How to promote open science in your research?

1. Draft a **data management plan (DMP)** at the beginning stage of your research and update the plan regularly.
2. Ensure that your research data, code and methods **are appropriately documented and shared in a repository.**
3. Aim to publish all publication types (incl. doctoral theses) according to **open access principles.**
4. Use **Creative Commons CC BY 4.0 license** for open access publications and open research data whenever possible.
5. Use **ORCID researcher identifier** to improve your own visibility.
6. Acknowledge **Aalto's infrastructure (facilities or equipment)** that you have used in your research.

Open science support in Aalto University

1. Training in Research Data Management and Open Science

- Online webinar series in autumn and spring term
- Contact: researchdata@aalto.fi

2. Data Agents

- hands-on, first point of contact to researchers in their school
- Contact: researchdata@aalto.fi

3. Research Data Management (RDM) and Open Science

- Guidance in research data management and open science
- Contact: researchdata@aalto.fi

4. Open Access Publishing

- Guidance in open access publishing, open licenses
- Contact: acris@aalto.fi
