

Christina Kubisch – electromagnetic soundwalk 2004
soundwalk, induction microphones, electromagnetic pollution

<https://electricalwalks.org/>

<https://vimeo.com/54846163>

background -
created headphones to interact with her art works and to listen to them
there came disturbances that wasn't her audio
investigated that

has her own made headphones that capture the electromagnetic sounds
electric fields, listening

how she finds her walks, she put on her headphones and walks in the city, find interesting places
and write them down

where are, the shops, money, traffic, lights, stations, metro and more
every city has their own sounds, the cultural mechanics behind the tech

show a map as an example

https://electricalwalks.org/electrical_walks/turku-2011/

only finnish city

<https://electricalwalks.org/electrical-walks/>

maybe picking another? Hamburg one was pretty

show a few examples from

<https://electricalwalks.org/electromagnetic-sounds-archive/>

categories: art + sender/receiver

own reflections:

love the way to use the every day environments to let people find "secret" in them
changing the perspective of how space works
