

Dipoli serves as the main building of Aalto University. The building offers the entire Aalto community and visitors meeting and dining places, workspace, as well as facilities for events and exhibitions. Get to know all the angles!

09/2020

“The architecture for Dipoli was of a different kind; new and unexplored.”
–Reima Pietilä

Dipoli is a Finnish architectural gem. The bedrock and the surrounding forest have inspired the sculptural copper and granite façade. Dipoli was designed in 1966 by Raili and Reima Pietilä. The purpose of the building was to provoke discussion and to further develop over time.
