

# Energy Forum Assignment

Write short (100-200 words) *Learning Diary* entries on **five** Energy Forum seminars you attended. (see here for explanations what a learning diary roughly is:

<https://blogs.helsinki.fi/kielijelppi/oppimispaivakirja/> (in Finnish) ;

[https://www.jyu.fi/hytk/fi/laitokset/hela/en/studies/study\\_instructions/learning](https://www.jyu.fi/hytk/fi/laitokset/hela/en/studies/study_instructions/learning) (in English). See also the “Learning diary example” under “Materials”).

You can use the following as guiding questions in your discussion, or comment and reflect on other issues that came to mind during the seminar:

- What did you expect from the seminar, and did it fulfill your expectations? If not, what would you have liked to hear more about (and why)? What was particularly interesting, and why? What remained unclear?
- How did the topic link with what you already knew? Did the speaker make you think differently about something related to the energy transition? Did you disagree with the speaker about something (and if so, why)?
- What is your opinion on the speaker’s proposed solutions, do you feel they primarily reflect the strengths of the specific company, rather than (future) market and societal demand? Why do you think so?

Focus on **reflecting** and drawing your **own insights**, as opposed to just summarizing the content of the presentations – doing the latter is not the purpose of the exercise and will not lead to a good grade. As guidance, assume that the reader has also seen the presentations – refer to and highlight specific points when useful, but do not explain in detail what was said.

**Deadline:** Each of the assignment is due within one week from the start of the seminar (i.e. 15:59 next week). Submissions through Turnitin.

**Marking:** Each of the five diary entries marked 0-5, see “Evaluation Summary” in “Materials” for the details.
