

PART 1:

You will start by saying the first word in the right paragraph (*tee*) in Finnish. Your partner should recognize that word in their paper. Your partner probably wants you to repeat the words a few times. After your partner has recognized the word, they will say a word in Finnish, which you should recognize on the left side paragraph (under “kuuntele”) on your paper. Ask for repetition, if needed:

Voit sä toistaa? Can you say it again?

When you have decided which word it is say aloud the word on the right side of that word (under “sano”). Your partner tries to recognize that word in their paper.

Go on like this until your partner says the task is finished.

ALKU start	tee

PART 2

This time your partner will start by saying a word and you should recognize it. Go on until you reach "loppu". Make sure you have pronounced all the words before that. Start again if needed.
