## semantic associations platforms

# Semantic association

Solveiga Bucyte

Connotation of precision engineering, aerodynamics, and high performance.

Represent sleek, efficient, and powerful products with drive for technological innovation.

### IITALA 1881

Similarly how Stonehenge is an iconic symbol of British culture, Iittala's new logo symbolises cultural heartage in Finnish culture.

Association with timeless, clasic Finnish design.

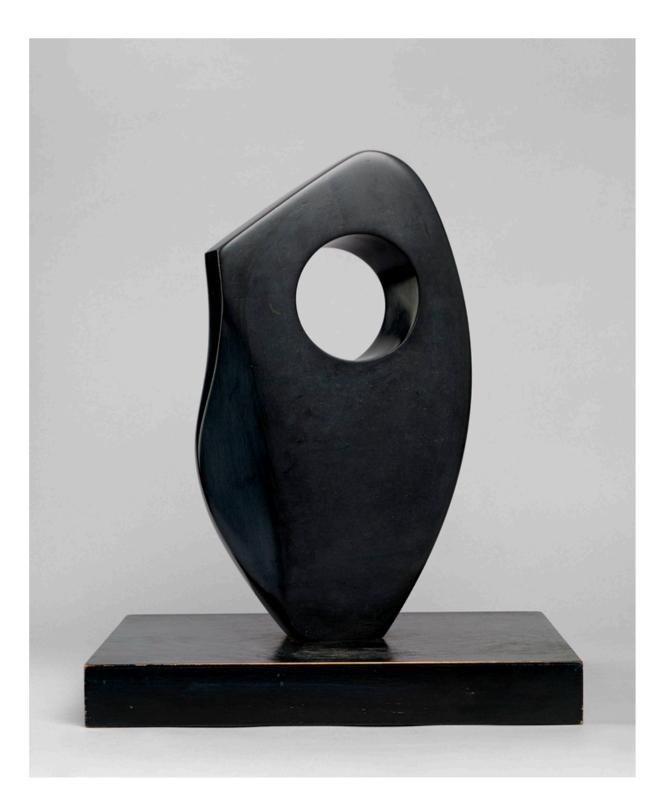

Consideration of nature and sustainability in brand values.

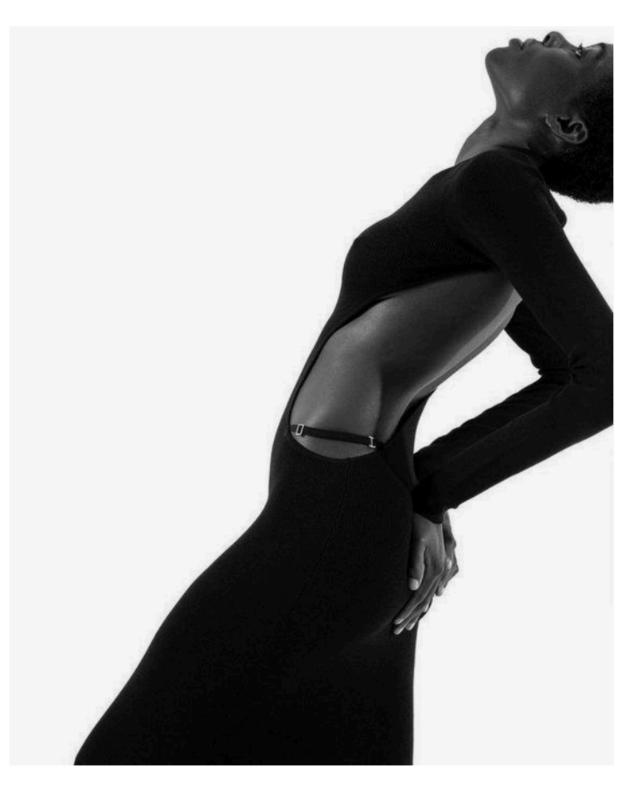

Association to Finnish climate, strengthening heritage.
Imlying that the glass is a delicate art piece that is as fridale as thin melting ice.

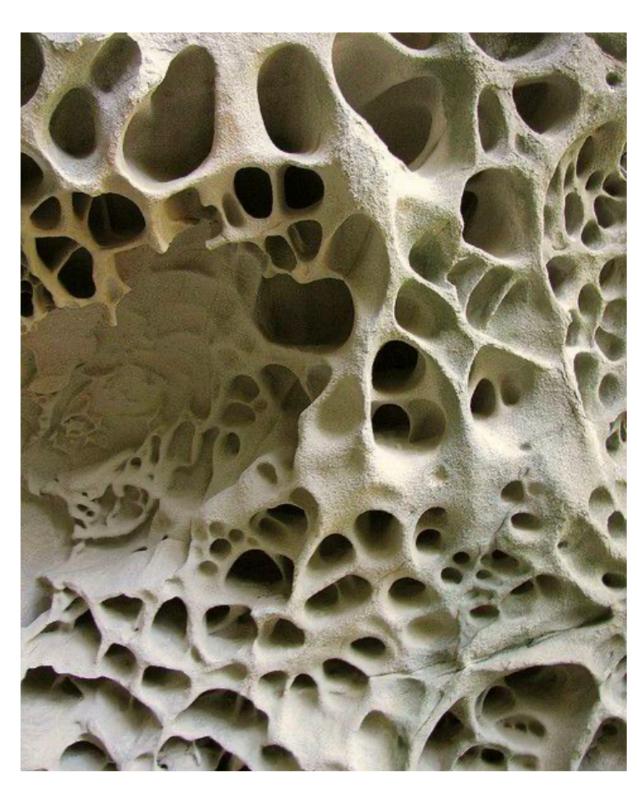

Single Form | Barbara Hepworth

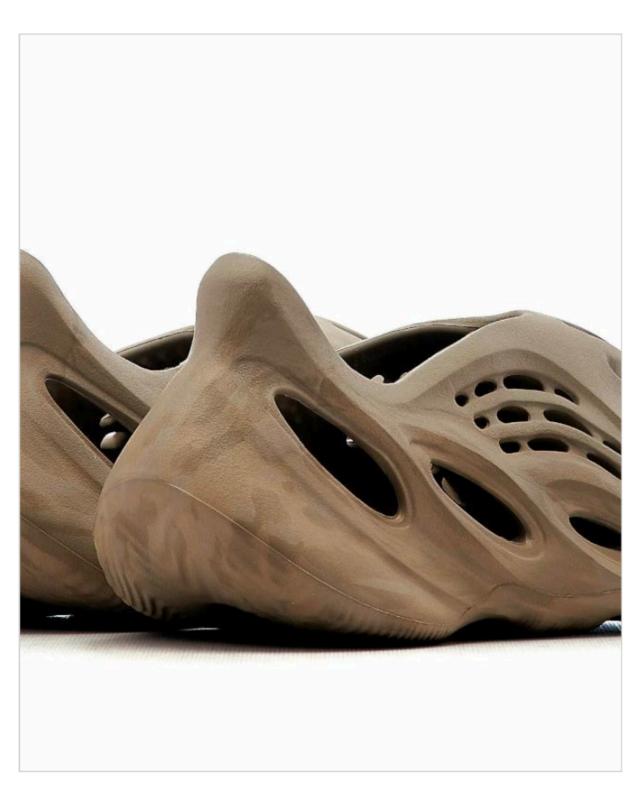

Gucci SS91 | Tom Ford

Under the artistic direction of Tom Ford Gucci has taken a different direction from what it had been previously. The art director gave the brand sensuality and provocation, with curvaceous lines as well as cuts and line contrasts. Tom Ford's design emphasis focused on the silhouette, on enhancing the body through an opulent use of materials. Just like this shortened version of Barbara Hepworth's Single Form, which aims to enhance, by alternating sinuous lines with sharp cuts and holes, the contrast inherent in human nature, both physically and psychologically.

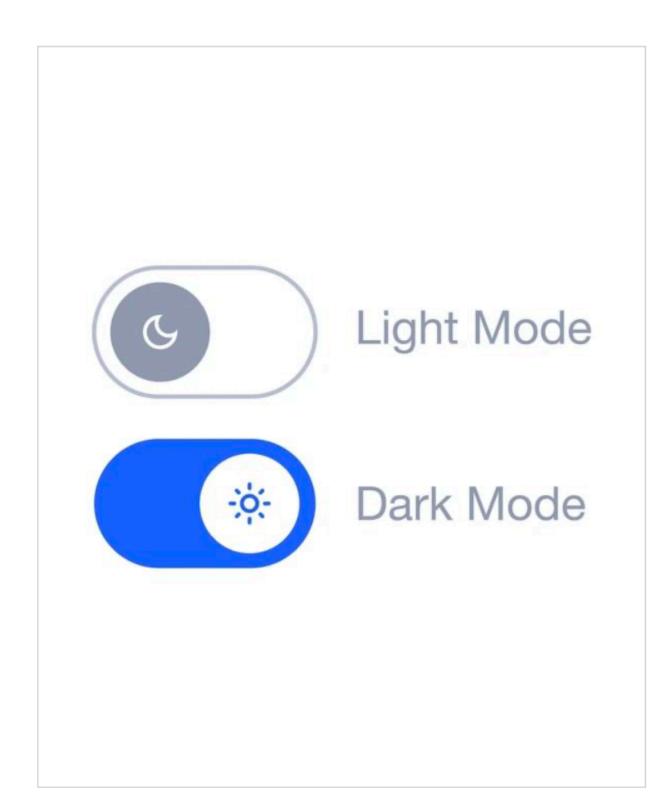

Sand rocks | Australia

Adidas Yeezy Foam Runner

Organic and nature-based shapes, textures and colours, have been largely used in contemporary design as an inspiration and a reference for bolder projects. The Adidas Yeezy Foam Runner have this iconic organic pattern, that combined with the material chosen, molded foam, creates this smooth but spongy effects, just as their reference, the sand rocks.

Light switch controls

When it comes to design an interface the use of semantic associations are crucial, in order to convey meanings that gives affordance and the user can easily recognise. The case of the darkmode switch feature is one of the most evident example of this semantic association within the Interactive Behaviour and Assistive Capability. The switch action resembles what you could do in real life when you ON/OFF the lights at home.

### Smartphones vs. Tablets

### Visual Appearance

- Smartphones: Smaller screen size, typically 5-6 inches, with a compact form factor.
- Tablets: Larger screen size, typically 8-12 inches, with a broader form factor.

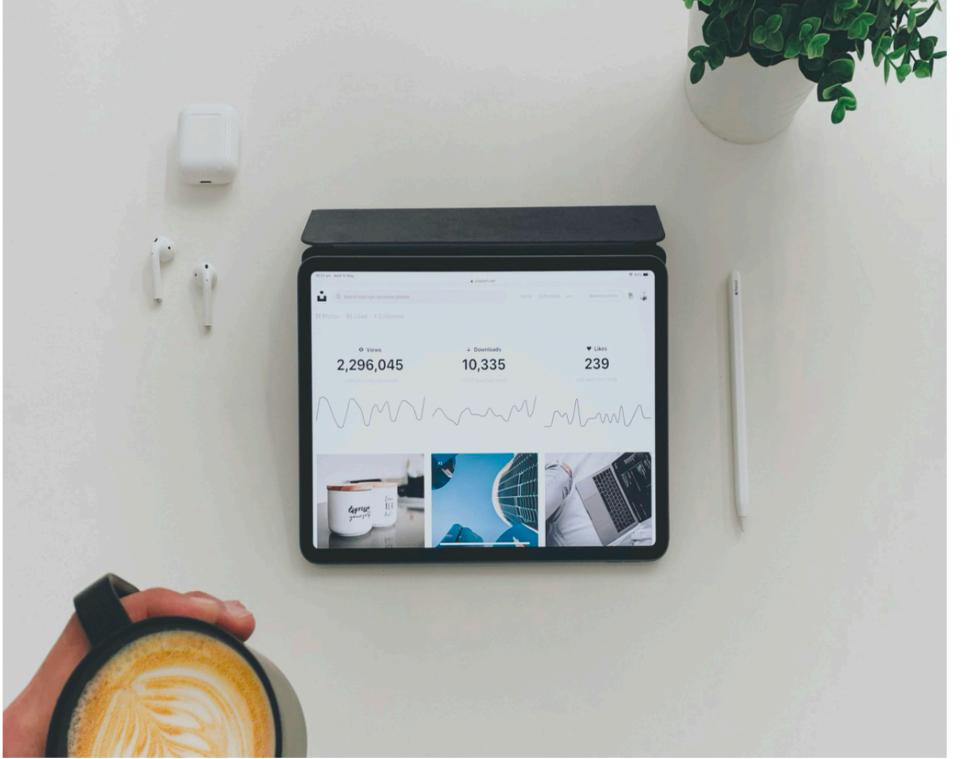

### Interactive Behavior

- Smartphones: Singlehanded use, touch screen interactions, swipe gestures.
- Tablets: Two-handed use, touch screen interactions, multitasking with splitscreen functionality.

### **Assistive Capability**

- Smartphones: Voice assistants like Siri or Google Assistant, accessibility features such as screen readers and magnification.
- Tablets: Larger display for easier readability, support for stylus input for drawing and note-taking.

Semantic Association Riccardo L. Grossi

Traditional Watches vs. Smartwatches

### Visual Appearance

- Traditional Watches:
   Analog display with mechanical hands, classic and timeless designs.
- Smartwatches: Digital display, often with customizable watch faces, sleek and modern designs.

### Interactive Behavior

- Traditional Watches: Simple interface, timetelling, sometimes include date and stopwatch functions.
- Smartwatches: Touch screen interactions, notifications, fitness tracking, and app integrations.

### Assistive Capability

- Traditional Watches: Basic timekeeping, no advanced assistive features.
- Smartwatches: Health monitoring (heart rate, ECG), GPS navigation, voice commands, and fall detection.

Semantic Association Riccardo L. Grossi

Laptops vs. Desktop Computers Visual Appearance

- Laptops: Portable, all-inone design with built-in keyboard and trackpad, varying screen sizes (typically 13-17 inches).
- Desktop Computers:
   Separate components
   (monitor, keyboard, mouse,
   CPU tower), larger screens
   (typically 21 inches and
   above).

Interactive Behavior

- Laptops: Mobile computing, trackpad and keyboard input, batterypowered, easy to transport.
- Desktop Computers:
   Stationary computing,
   typically more powerful hardware, multiple peripheral connections, and larger workspace.

Assistive Capability

- Laptops: Built-in webcams and microphones for video calls, portability for remote work and learning, touch screens on some models.
- Desktop Computers: Highperformance capabilities for demanding tasks, multiple monitor setups, extensive connectivity options for specialized peripherals.

#### VISUAL APPEARANCE

LUSH PRODUCT Lama shape bath bomb

SHAPE ASSOSIATION: Colorful, fun and playful Pinjata

**LUSH PRODUCT**Pink and blue
glitter bath bomb

COLOR
ASSOSIATION:
Cute and positive
childhood memory,
My Little Pony

**LUSH PRODUCT** Glossy shower jello

**ASSOSIATION:**Wiggling eatable jello dessert

#### INTERACTIVE BEHAVIOURS

LUSH PRODUCT
Pink shower gel
called Snow Fairy

SMELL ASSOSIATION: Sweet and sugary candies and cottoncandy drinks

**LUSH PRODUCT**Bath bomb twirls

MOVEMENT ASSOSIATION: Space twirls

LUSH STORE
Pick and mix
product "buffet"

APPEARANCE AND USAGE ASSOSIATION:
Rich and abundant pick and mix candy shop

### ASSISTIVE CAPABILITY OF ARTEFACTS

VISUAL GUIDES
Clear in-store
symbols and
guides

ASSOSIATION:
Visual aids help customers
to navigate and find the
right products

'Naked' products without packaging

ASSOSIATION:
Reduce waste and
accessibility also for
people with disabilities

Articles and product information

ASSOSIATION: Transparency, clear information and guidance to its users

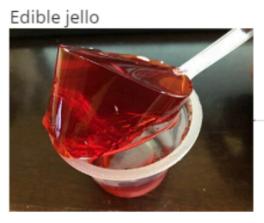

Pick and mix candystore

Store layout

Soap

Fresh ingredients mixed by hand

Examples of Semantic Connection(s, Association(s, Transformation(s Framework

Xiangyi Wang 17.05.2024

## Airplane Wings

The Wright brothers studied birds to understand flight mechanics. Modern airplane wings often take inspiration from the shape and structure of bird wings, optimizing lift and reducing drag.

## Patagonia

Patagonia's branding is deeply inspired by nature, particularly the rugged and pristine environments that outdoor enthusiasts seek to explore and protect. The iconic logo of Patagonia features the silhouette of Mount Fitz Roy, a mountain located in the Andes near the border between Argentina and Chile.

### Superhydrophobic Surfaces

Inspired by the water-repellent properties of certain plants and insects, materials with superhydrophobic surfaces are used in various applications, including waterproof clothing and coatings for electronic devices.
