Feedback and thoughts of course session 1

- I learned that…teaching is even further from trivial endeavour than I thought

- We want to be good teachers!

- So many "energizer" type exercises!

- Nice to have a possibility to learn new things again ☺

- Surprisingly many think computers make good teachers ☺

- Different kind of "optimal" teachers/different people find different things challenging

- Development/improvement

- With right amount of effort & motivation, anyone can become a good teacher

- Interesting! Nice to show methods in practice

- Learned: concept of a good teacher is very different & wider than I initially thought

- Interesting thoughts about teaching & skills needed for good teaching

- Importance of networking

- Possibilities

- There are a lot of qualities that a teacher needs, but no-one can have them all!

- Talk with other teachers

- Promising/it has been a good synthesis work/many points to improve for being a good teacher

- I remembered today that actually the best way to learn is when you teach others -> assignments for students that they have to "teach" their study colleagues

- Learned attributes of learning

- Good motivation, ability to explain why the topic the student is trying to learn is important, and know ones strenghts and weaknesses are important skills for teacher

- Get to know people with [conb..] opinion
