School of Electrical  
Engineering

# Group work 2 topics

*14.2.2019*

*Santeri Paavolainen*

# Overall

- **Same structure as previously**
  - Grading per group
  - At least one must present
  - Focus on what you think about
- **Presented at the beginning of 28.2. lecture**

# Topics

## Pick one!

1. Where to use “conventional” cloud instances vs. containers vs. serverless
  2. Cloud market: What reasons can affect choice between vendors?
  3. There’s more than one: Alternative container platforms to Docker
  4. Example of existing system based on microservice architecture
    - *Not Netflix, Google or Amazon!*
- **Hint: Check out Cloud Native Computing Foundation**
  - CNCF Cloud Native Landscape
  - **As before, the “why?” is important: why you think \_\_\_\_ is so?**
