

Design a workplace – Team exercise – Presentation instructions

Schedule

- 10 teams
- 5 + 2 min / team = 70 min
- Voting and announcing the winner = 10 min
- Extra time for miscellaneous 10 min

The task for the students

Imagine you would be in recruitment and career fair, where each company has 5 minutes to convince the graduating students that they should join your company.

Your task as a presenter:

- Make as convincing pitch for your company as possible. Try to convince the audience that they should join your company
- You don't have to answer every single question of the written assignment in your presentation.
 - But provide some information relating to all the question categories of the written assignment (i.e., motivation, structure, policies, the company)
- Use PowerPoint slides for your presentation
- Maximum length: 5 minutes (this will be enforced as we have a limited amount of time)
- 2 minutes to answer audience questions

Your task as the audience:

- Think about yourself as a person looking for a job in this sector
- Make notes about each company so you can afterwards choose which company to go to
- If some claims of the company sound weird or 'too good to be true' ask about them afterwards
- If the company doesn't mention certain relevant aspects at all, ask about them afterwards
- Choose the company that sounds most convincing overall (taking into account the credibility of the claims)
