insta-stalk.js

```javascript
export default class InstaStalk {
    constructor(stalkee, InstaCrawl) {
        this.stalkee = stalkee;
        this.InstaCrawl = InstaCrawl;
    }
    run() {
        this.InstaCrawl.on('post', (post) => {
            for each like in post.likes {
                if (like.name == this.stalkee) {
                    this.trigger('stalk-like", post.author);
                }
            }
        });
    }
}
```

stalker.js

```javascript
import InstaStalk from './insta-stalk.js'
import InstaCrawl './insta-crawl.js'
const stalkLikes = {}
const instStalk = new InstaStalk("avnerus", InstaCrawl);
instaStalk.on('stalk-like', (author) => {
    if (!stalkLikes[author]) {
        stalkLikes[author] = 0;
    }
    stalkLike[author] = stalkLike[author] + 1;
    if (stalkLike[author] >= 3) {
        console.log(author + " liked the stalkee more than 3 times!");
    }
});
instaStalk.run();
```
