
Organisational change in the digitalization era – how to bring the myth to life?

Milja Nohynek

Karoliina Kettukari

14.3.2019

Nice to see all of you here!

- *Introductions*
- *Bold promise*
- *Promising yet boring content*
- *Awkward assignment*
- *More boring content*
- *Everything you really need to know in one slide*

Nice to see all of you here!

- *Introductions*
- *Myth of change management by the book*
- *Change in self governance organizations*
- *Awkward assignment*
- *Reality check: change in large organizations*
- *Everything you really need to know in one slide*

Your amazing lecturers

Milja Nohynek

- Driving digital workplace change at large Finnish organizations
- 6 years in consulting business
- Msc / Aalto University Business School

Karoliina Kettukari

- Co-creating modern digital workplaces and changing the organizational culture
- 7 years experience of improving internal communications and teamwork
- MSc / School of Management, University of Tampere

Our bold promise...

We will tell you everything you need to know about change in organisations

AND we will tell you why you can forget everything you just learned about change in organisations

Part 1:

*Myth of change
management
process by the book*

Everyone has an opinion

Organizational Change in Principles ...
wisdomjobs.com

Process Phases	Concepts	Tools/Mechanisms	Outputs
Making the Case For Change	Urgent, shared need - Incomparable Status Quo	• Data, Demos, Demos - Shared Vision - 30/30/30 Term	Change "hook"
Shaping/Steering the Mission	• "Strategic" questions - Guiding Coalition	• Diagnostic analysis - Influence Strategy	Vision/Values - "Big change" agent/ team
Unfreezing/Overcoming	• Break-based action - Short-term wins	• Force-Field Analysis - "Engagement" planning	Transition Plan (1st QD) - Behavioral - Structural - Symbolic
Making Change Last	• Monitor, Celebrate Success - Anticipating Change	• Change Incentives - Systems, & Structures - Address	Examples - Structure change "landslide"

Change management theories are like beauty product ads. They give you (false) hope.

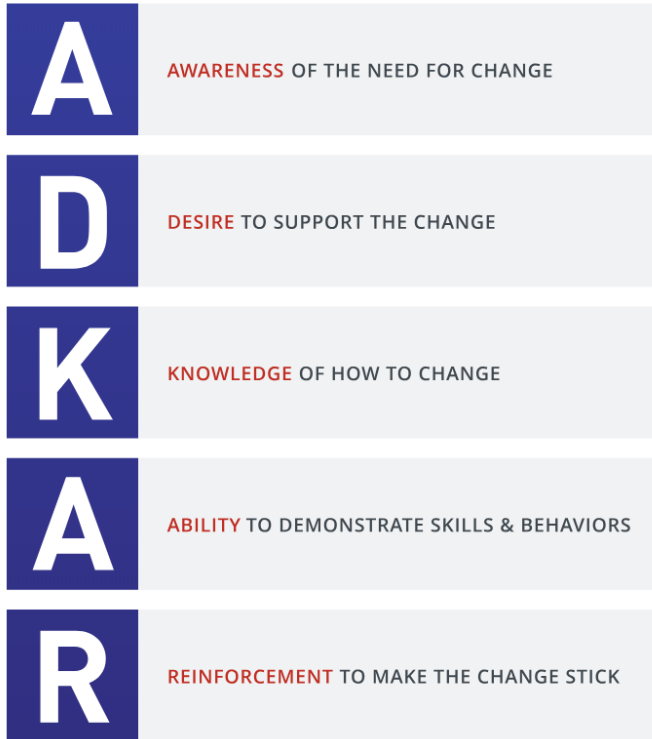

Case: from theory to practise

Photo

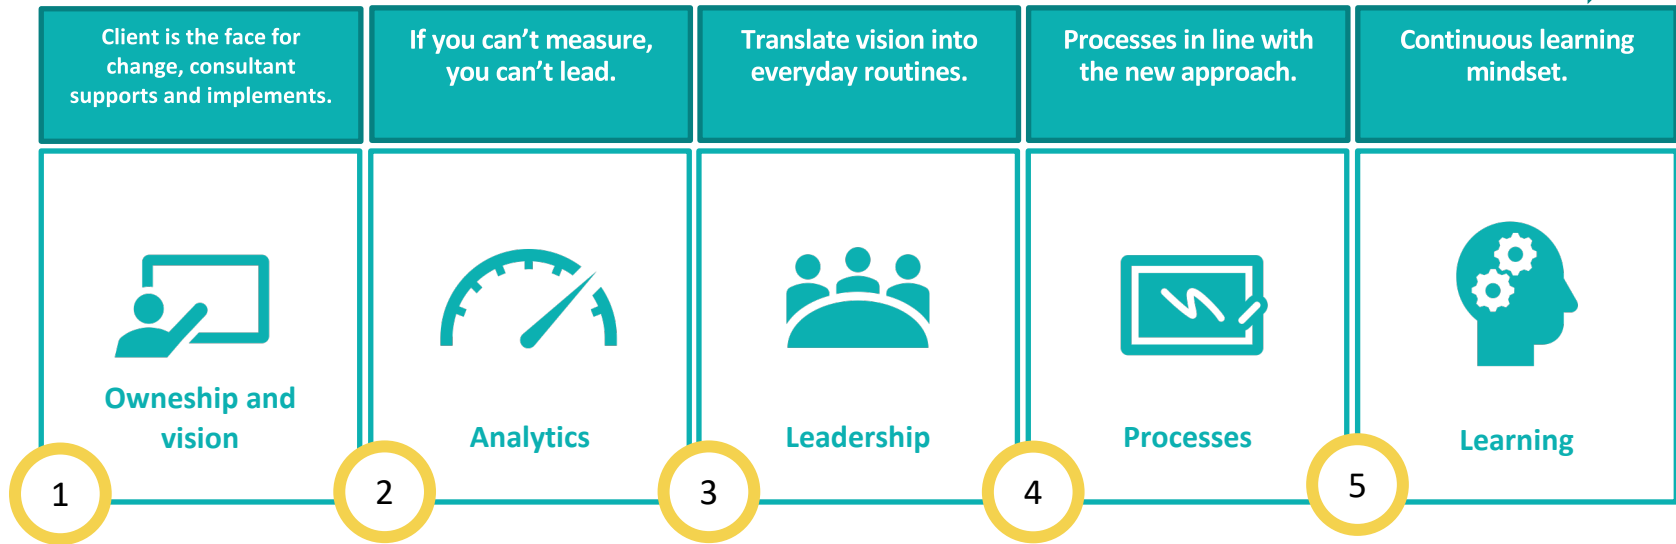

In theory: Prosci Adkar Model

Prosci Adkar Model

How the customer buys it

An organization changes, when..

How we really do it

(confidential)

Good theories never work
the same way in practice

Why?

Because we're humans, not objects

Part 2:

*Change in self governance
organisations*

Background theory ;)

Adaptive management of change

- Low to none hierarchy
- Giving and taking responsibility
- Open communication
- Co-creating
- Mindfulness
- Leadership and management as a narrative discourse
- Aims to empowerment of the employees and the organisation

Read more (in Finnish): [Master's thesis: Mahdollistavan johtajuuden \(ante\)narratiiveja \(2014\)](#)

Itseohjautuvuus in English

1

Self determination

2

Self organisation
Self governance

3

Self leadership

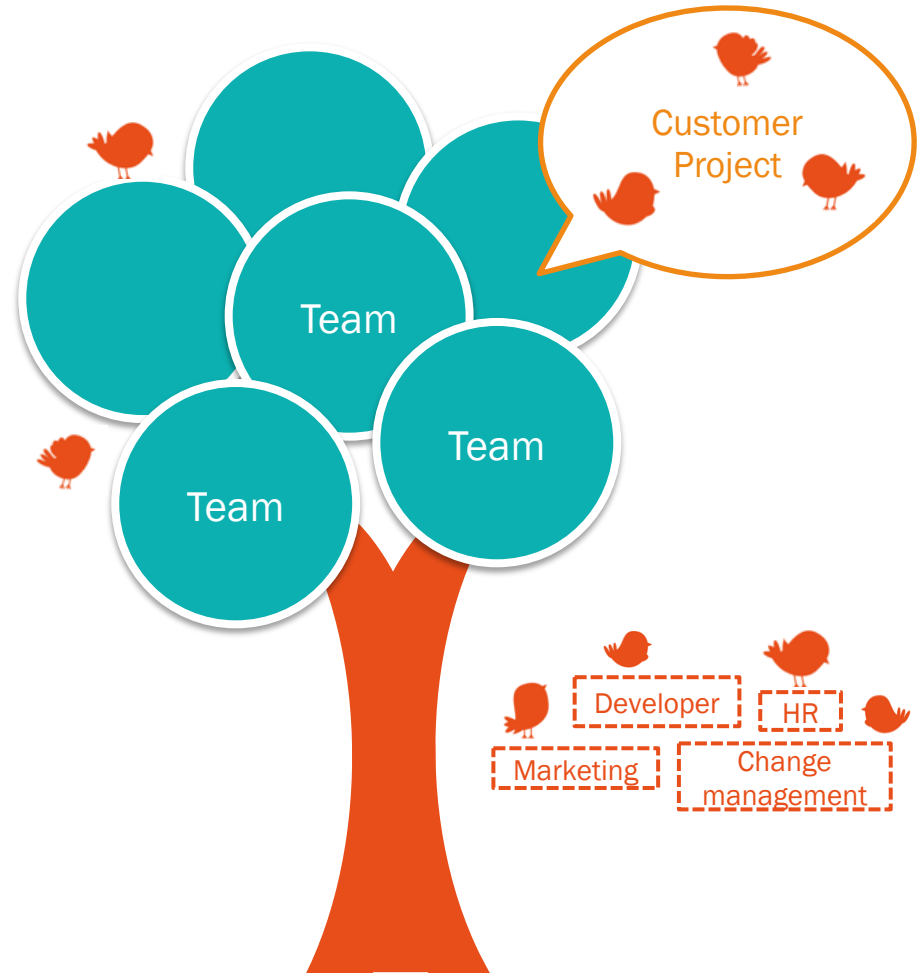

4

Empowerment
Shared leadership

Organization at Digital Illustrated

- 70 humans, 0 managers
- Flat organization
- DI provides facilities and sets economic constraints
- Self-organized teams based around customers and projects
- Virtual teams for competence sharing and support functions
- Coaches & mentors for personal development

What it takes to be self organised?

Be responsible

- Communication
- Focus
- Resilience

Photo

What it takes to be self organised?

Be human

- Empathy
- Where's people, there's structures
- Work and life balance

Photo

Be the change that you wish to see in the world

- If you want something to happen, do it yourself
- Be brave and experience
- Not all good ideas go viral
- Have patience: time is a relative construction

Photo

Knowledge sharing is power

- Open communication with centralized tools designed for work purposes
- Common work, common files
- Virtual teams
- Beer & Talk
- Breakfast Keynotes
- Retrospectives

Part 3:

Reality check: change in large organisations

The story about the monkeys

If it was possible to ask the monkeys why they beat up on all those who attempted to climb the ladder, their most likely answer would be “I don’t know. It’s just how things are done around here.”

Moral of the story?

Next time someone says, “That isn’t how we do things here,” ask the question “Why?” It may generate some interesting new thoughts and discussions. If not, tell them about the five monkeys and the bananas.

Disclaimer

Another moral of the story?

‘That “Five Monkeys Experiment” Never Happened. Obviously.’

It’s a story. On the internet.

Culture?

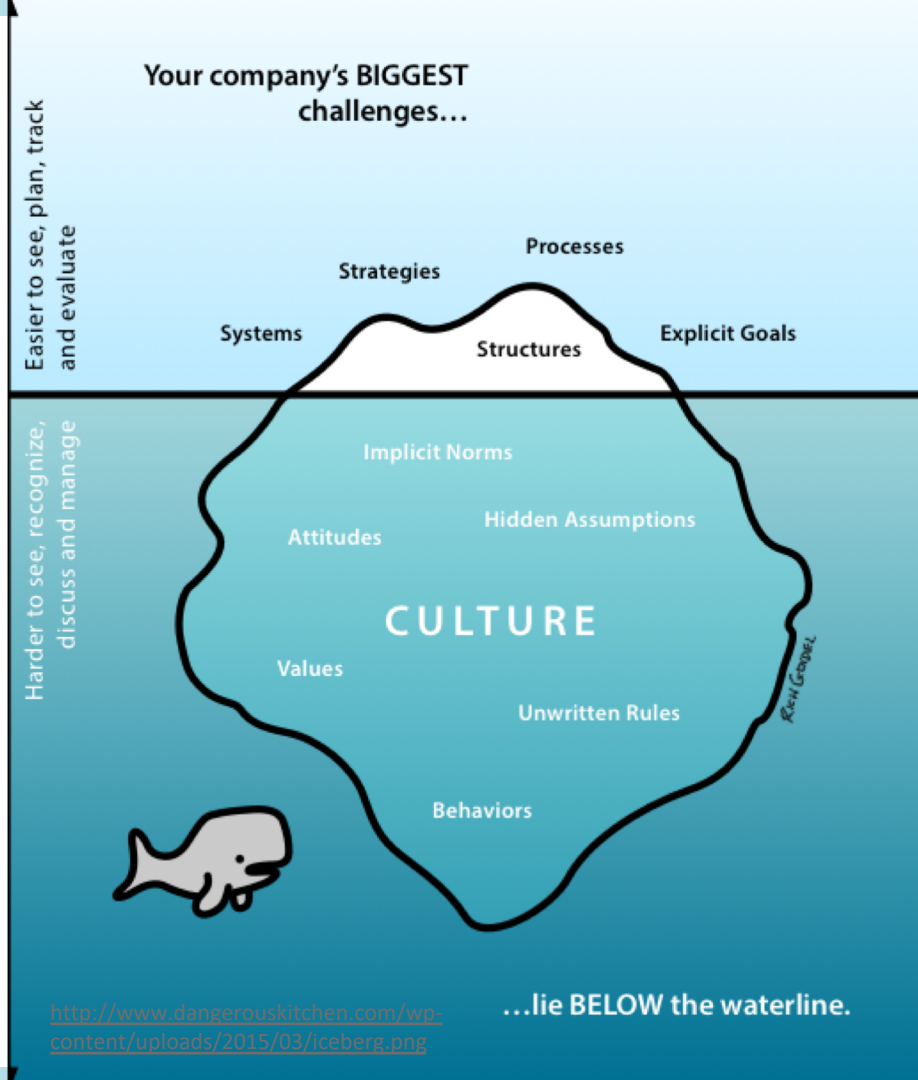

VISIBLE: Systems, strategies, processes, explicit goals, structures

NON-VISIBLE: implicit norms, hidden assumptions, attitudes, values, unwritten rules, behaviors

-> When complexity of work grows, non-visible elements becomes more important than visible elements

-> That's why it's important to focus on the non-visible elements of the culture more in knowledge work based organizations

-> Which is hard and time consuming

IT Projects are not about technology.
They are about changing the way we work

— Every (IT) Consultant, everywhere, all the time

Why everything fails?

”

68% of IT projects fail”

Why?

Legacy culture prevents digital adoption:

- Analogic tools and working habits
 - Strict processes and control
 - Authoritarian hierarchies
-
- High complexity work cannot be handled with strict processes
 - No “one size fits all” – model because every context is different
 - Too much focus on gluing new tools on old way of working

Change in IT in large organizations in Finland

..as seen from consultant's perspective:

- Companies are moving to the cloud
 - Work from anywhere, anytime is starting to get more standard (wuhuu!)
- New tools emerge quickly

However..

Organizational "Game of Thrones" often prevent the best solutions to be made from the end user point of view

People experience "new tool fatigue"

There is huge gap between employees' digital skills

Millenials vs. Baby boomers

Millenials

- Trying new things all the time
- Collaboration & team work

Baby boomers

- "If you don't know how it works, you cannot touch it"
- Knowledge is power (& limited)

Citations from real-life situations

“I have no time to learn these tools”

“Personally I don’t like to send messages.”

”I cannot find the instruction paper on how to add the attachment to email, so can I send this issue to you tomorrow?”

”Where can I find the Internet?”

Story of cucumbers and pickles

Cases:
How the change is
actually happening in
large organizations in
Finland?

Case: Enterprise Social

“Enterprise social software (also known as or regarded as a major component of Enterprise 2.0), comprises social software as used in “enterprise” (business/commercial) contexts.”

Adoption of Enterprise Social in Finland

Why Enterprise social projects failed?

- Enterprise social is not mandatory to use in traditional way
 - Like billing systems or time tracking systems
 - No easily visible connection to revenue
- Organizational context differed radically between organizations
 - Cases VR and YIT
 - "Presence of management was the biggest strength of Yammer adoption"
 - "Absence of management was the biggest strength of Yammer adoption"

Lessons learned: Different adoption tools we use now to drive change

- Background analysis
 - Culture & way of work analysis
 - Questionnaires, interviews
 - Pilots
- Executive & managerial buy-in
 - Top-management workshops
 - Business decision makers' workshops
 - Middle-management workshops
- Key user involvement
 - Change groups (all levels, top influencers)
 - Coach network
 - Virtual teams
- Employee-level workshops & trainings
 - Learning centers, videos, clinics for teams

Part 4:

*Everything you
REALLY need to
know about change
in organisations*

OWNERSHIP

QUALITY
OVER
QUANTITY
