

Protopaja 2019 project idea

ThrowCam - Throwable camera with speaker and microphone

The ThrowCam provides extra vision on the battlefield or fire. Soldiers deploy it like a grenade, throwing it to an obscure area that they want to reveal. Target is to reveal hidden enemies or a person under threat of fire.

Proposed characteristics for the proto:

Size: Maximum about the size of tennis ball

Camera: Wide-angle video footage day or night, infrared night time illumination preferred, still image at minimum

Voice: mono speech-codec at minimum, spatial audio at maximum

Connectivity: 5G/4G LTE preferred
