Outcome oriented design

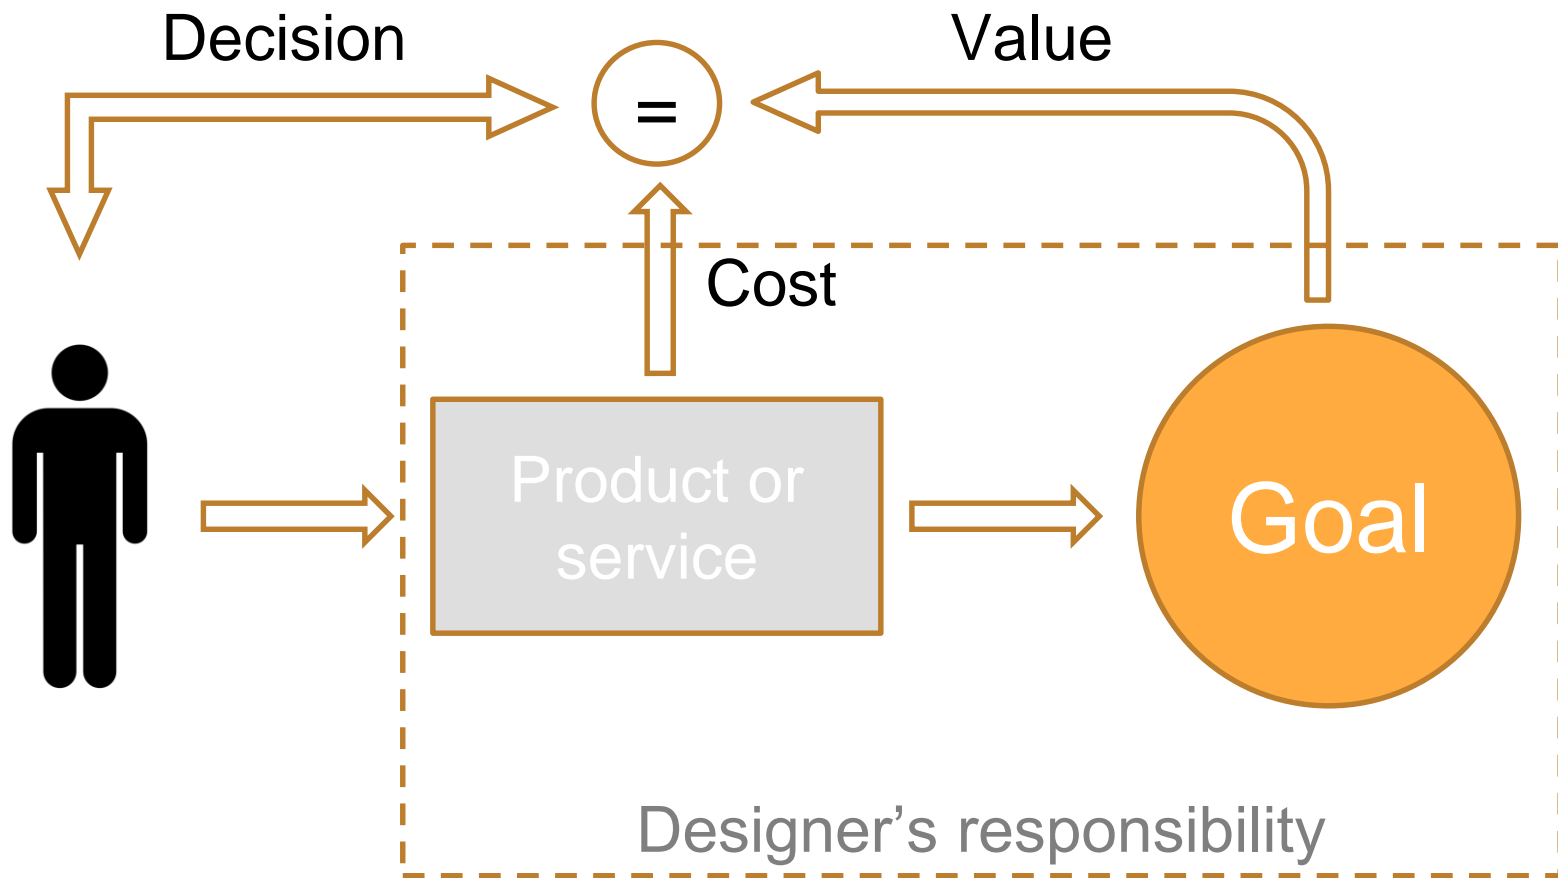

Known under many different names: Jobs to be done, Goal directed design, Task analysis, etc
<https://jtbd.info/know-the-two-very-different-interpretations-of-jobs-to-be-done-5a18b748bd89>

Goals	Design for
Values	Personal fulfilment
Activities	Experience, habits
Actions	Effectiveness skills, muscle memory

Costs
Social acceptance
Use of own time, convenience
Price, cost of ownership, learning

Unintended outcomes

- Pollution and global warming (CO₂, NO_x, ..)
- Social impact (skills obsolescence, child labor, ..)
- Consumerism (over-consumption)
- Short product life-cycles, design-for-obsolescence
- ...

Business Model Canvas

Producing the offer

Serving the customer

The bottom line

The Business Model Canvas

Designed for:

Designed by:

Date:

Version:

Key Partners 	Key Activities 	Value Propositions 	Customer Relationships 	Customer Segments 
	Key Resources 		Channels 	
Cost Structure 			Revenue Streams

Pages 1-100: <https://strategyzer.com/value-proposition-design>

Segmentation based on some common aspect

- Customer characteristics (age, gender, geography, ..)
- Customer preferences (color, design, ..)
- Channels to reach customers (online, store, ..)
- Customer skills (need for supporting services, ..)
- Price sensitivity
- ..
- **But most important of all: desired outcome!**

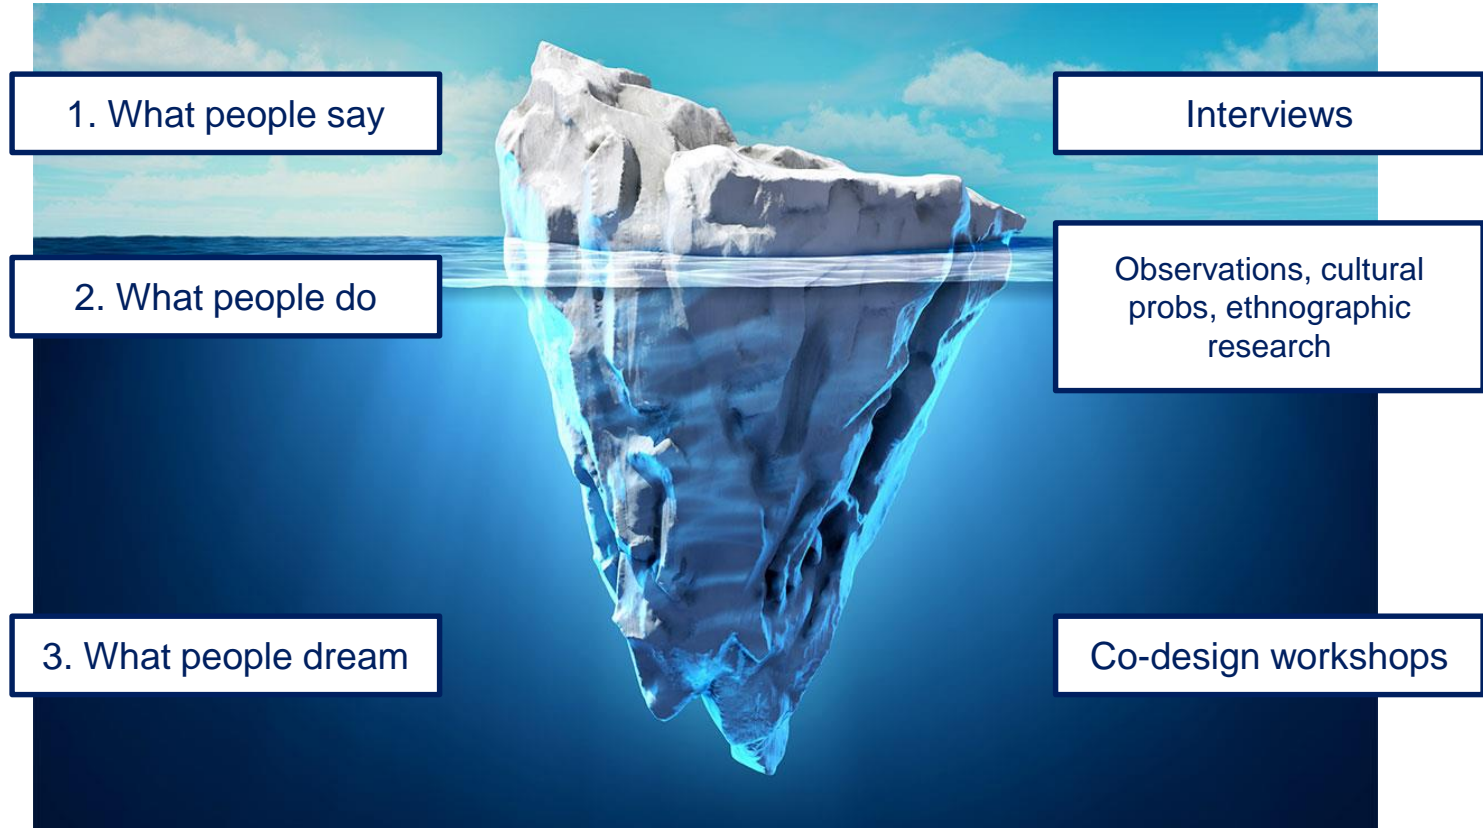

Segments considerations (business-wise)

- Segment size
- Segment growth potential
- Additional cost associated with segment (features, customizations, ..)
- Marketing and sales channel costs

User research

Users' research. Levels of insights gathering

1. What people say

Interviews

2. What people do

Observations, cultural probs, ethnographic research

3. What people dream

Co-design workshops

**Open-ended
interview**
made to gather
qualitative data and
insights

Interviews

Expert interview
made to get the
knowledge in the field

**Structured ethnographic
survey**

rigid structure and list of
questions, made to gather
quantitative data

CREATE A FOCUS

A good focus helps you to:

- Identify the correct stakeholders for research
- Not spending too much time asking the wrong things
- Helps you prepare the right themes and questions
- Keeps your research on topic

A focus should strike a balance: not too wide (irrelevant data) and not too narrow (missing insights)

Open-ended interview

made to gather
qualitative data and
insights

GOAL:

To understand experience, gather insights,
define pain points and opportunities.

How to make:

- define interviewees;
- based on the research prepare themes or questions for interviews;
- listen more than talk;
- don't lead the interviewee;
- don't judge and don't evaluate answers;
- avoid closed questions for which one can answer yes or no;
- focus on the interviewee, don't start telling about your own experiences.

Open-ended interview

made to gather
qualitative data and
insights

RULE OF 5 x WHY

Observed problem:

People are unhappy at work

Assumption about the problem

People don't like their jobs

1. Why did this happen?

They don't think they're doing the right things

2. Why did this happen?

They can't choose what they are working on

3. Why did this happen?

Management gives orders on what to work on

4. Why did this happen?

There is a policy of top-down management

5. Why did this happen?

The company has not reviewed it's management policies

ROOT CAUSE

Interview in context

The interviewer asks the participant to walk through a service, product use or a future scenario

Observation

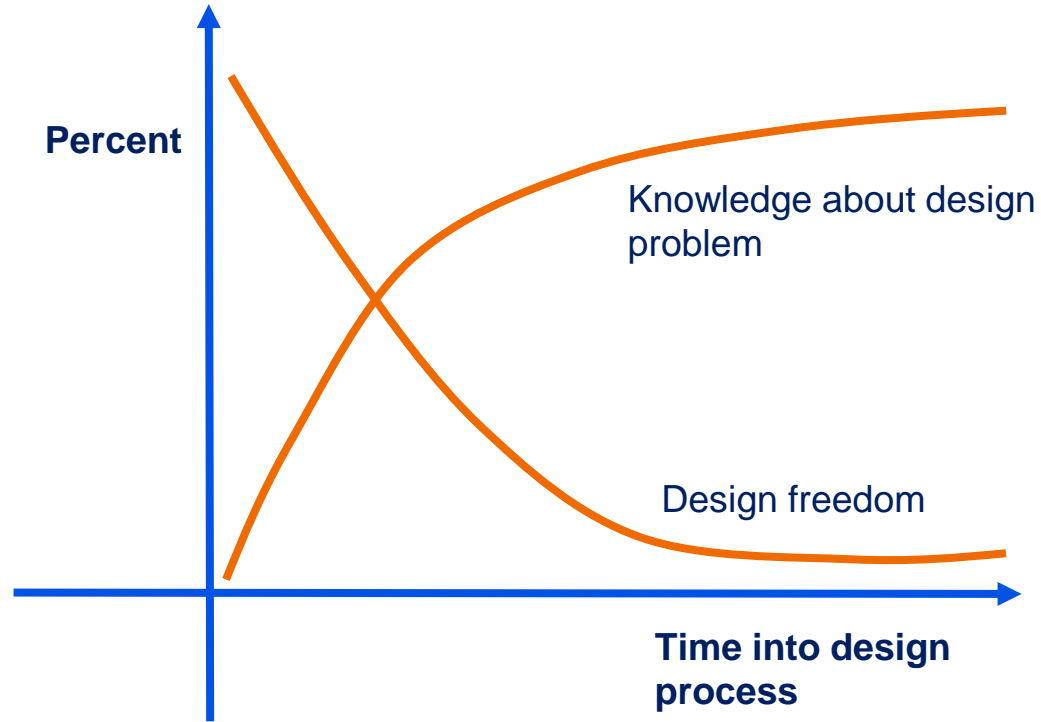

- People don't usually say what they think;
- People don't usually understand what they do.

“Better products don’t take longer to create, nor do they cost more to build. The irony is that they don’t have to be difficult”

*«The Inmates Are Running the Asylum: Why High Tech Products Drive Us Crazy and How to Restore the Sanity», Alan Cooper

DESIGN PROCESS PARADOX
